

Full Curriculum Vitae

Name: Ahmed Jasim Mohammed Al-Karawi

Position: Professor of Inorganic Chemistry at Mustansiriyah University, College of Science, Department of Chemistry, P.O Box 46010, Baghdad, Iraq.
E-mail: ahmedalkarawi@uomustansiriyah.edu.iq

Date of Birth: 13th August 1977

Academic Qualification :

2019	Postdoc., University of Kiel/ Germany (Synthesis of some coordination compounds with unique properties).
2016	Postdoc., University of Jena/ Germany (Synthesis, structure and magnetic properties of clusters containing a {Cu ₃ (μ ₃ -OH)} core).
2013	Postdoc. , Kansas state university/ USA (Synthesis of molybdenum and tungsten oxide based nanoclusters with unique properties).
2011 – 2013	Postdoc., University of Bielefeld/ Germany (Synthesis of molybdenum and tungsten oxide based nanoclusters with unique properties).
2007	PhD in Inorganic Chemistry - University of Baghdad. The experimental part has been carried out at Newcastle University/ School of Natural Science / UK.
2003	M.Sc. in Polymer Chemistry - University of Baghdad
2000	B.Sc. in Chemistry Sciences – University of Baghdad

Experiences:

● Teaching:

Postgraduate students	Characterization of photoluminescent liquid crystalline materials (mesogenes and mettalomesogens)
Postgraduate students	Nanocluster compounds
Postgraduate students	Advanced Inorganic Chemistry
Undergraduate students	Principles of Coordination Chemistry
Undergraduate students	Basic Inorganic chemistry

● Research Interests

Material Science	Synthesis and characterization of photoluminescent liquid crystalline materials (mesogenes and mettalomesogens).
Coordination Chemistry	Synthesis of new trinuclear copper(II) complexes based on Cu(II)-catalyzed click reaction.
Coordination Chemistry	Designing of new organic and organic-inorganic hybrid compounds.
Coordination Chemistry	Synthesis of new monosaccharide derivatives ligands and their transition metal complexes.
Polyoxometalates	Synthesis of polyoxometalates based nanoclusters with unique properties.
Biopolymers	Controlled release of drugs from hydrogel matrices based on polymeric materials.
Analytical Chemistry	Designing of new membranes as adsorbents for purification of water.

● Awards:

2019	Deutscher Akademischer Austauschdienst fellow/ Germany
2016	Deutscher Akademischer Austauschdienst fellow/ Germany
2013	ISFP/CRDF fellow/ US
2012	Deutscher Akademischer Austauschdienst fellow/ Germany
2011	Matsumae International Foundation/ Japan

● Selected Publications
