

Neuroanatomy

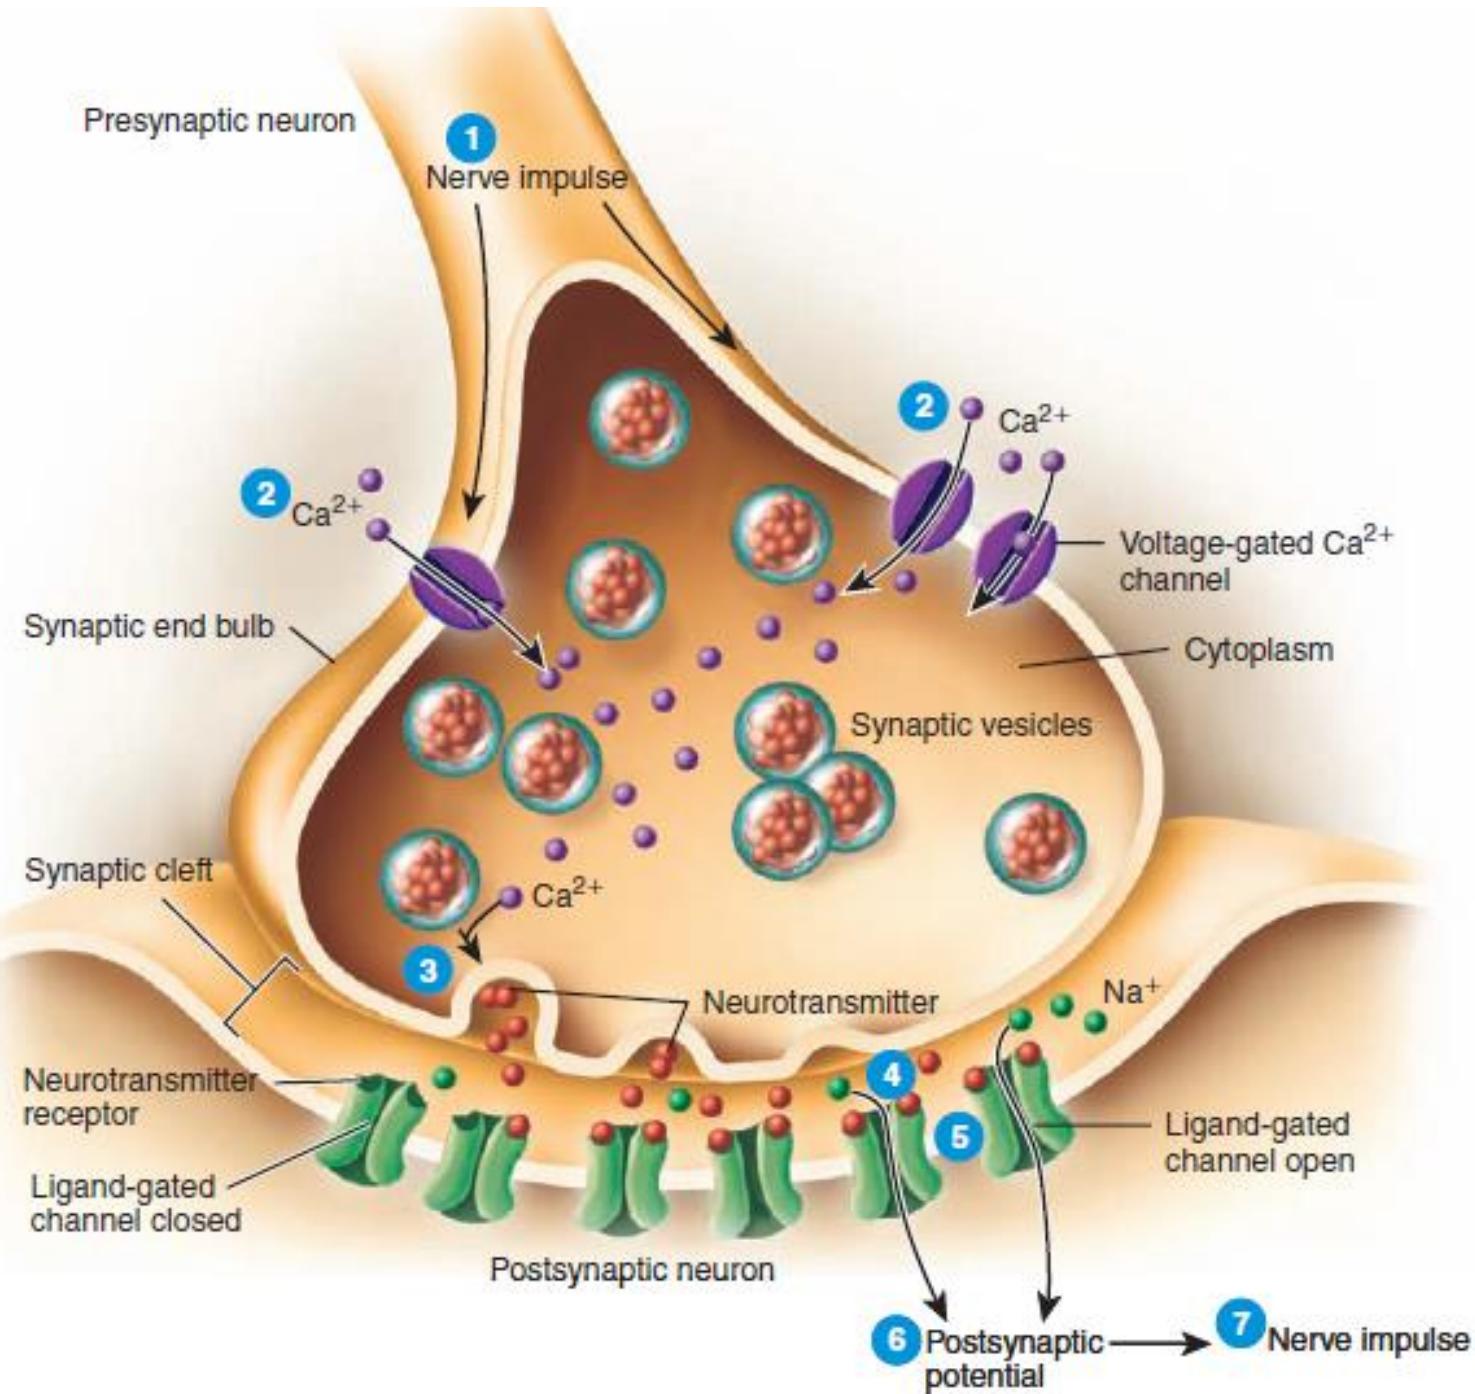

Dr. Ali Mohsin

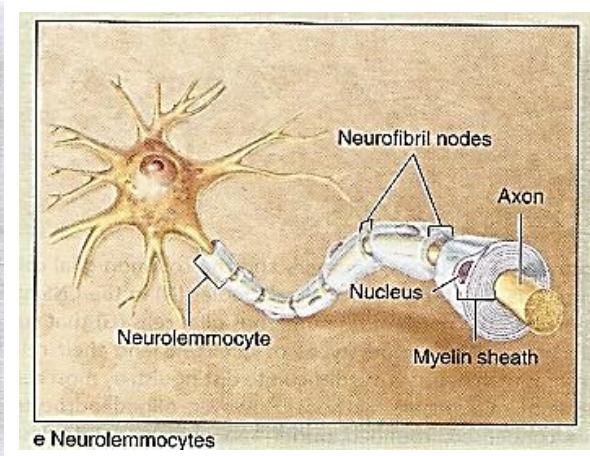

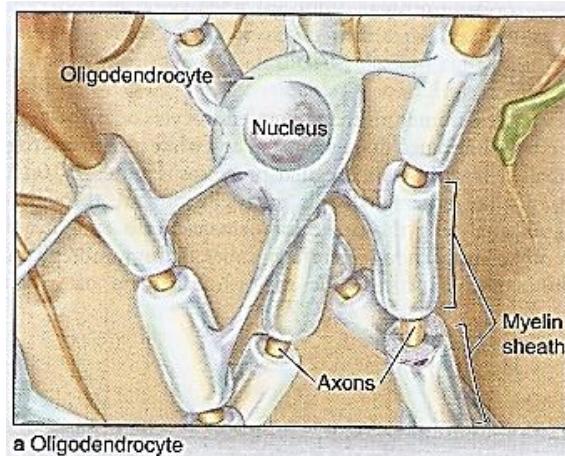

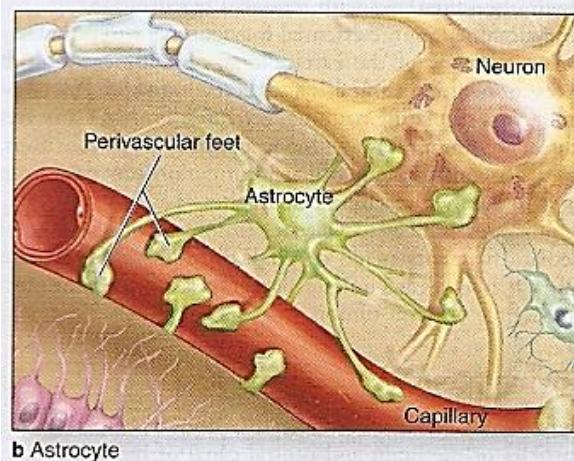

Nervous System Integration

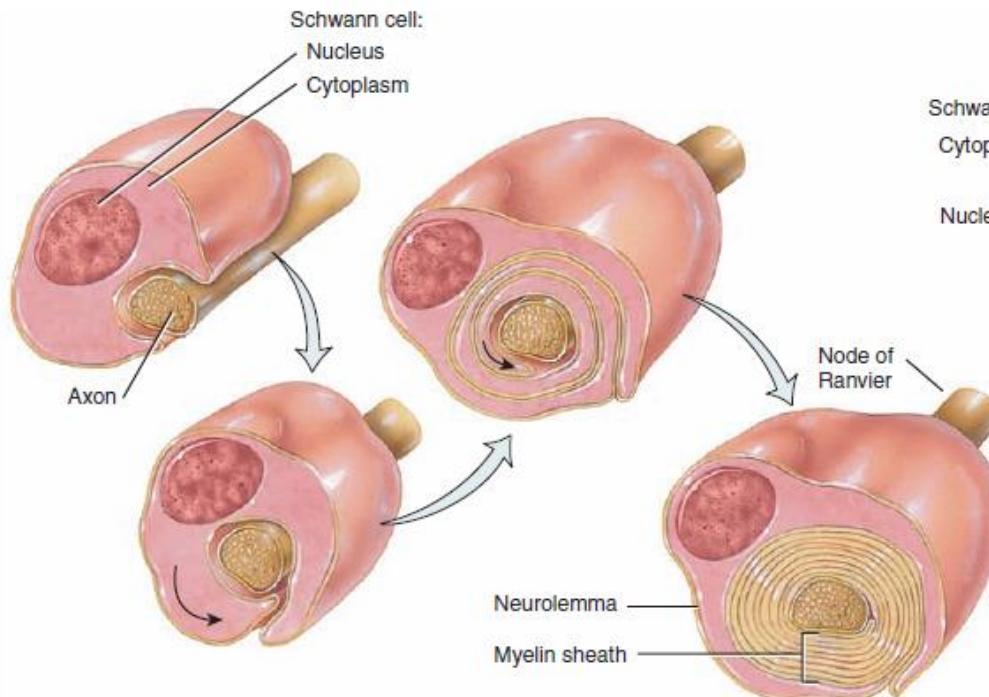

Glial Cells

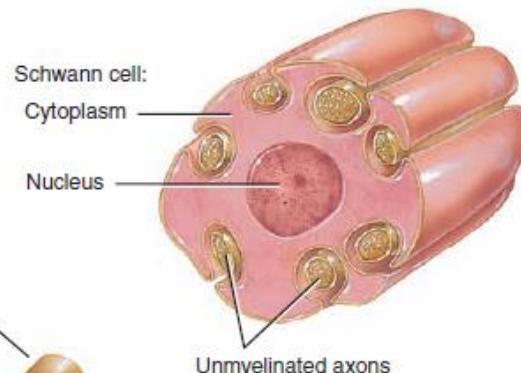

b Astrocyte

a Oligodendrocyte

e Neurolemmocytes

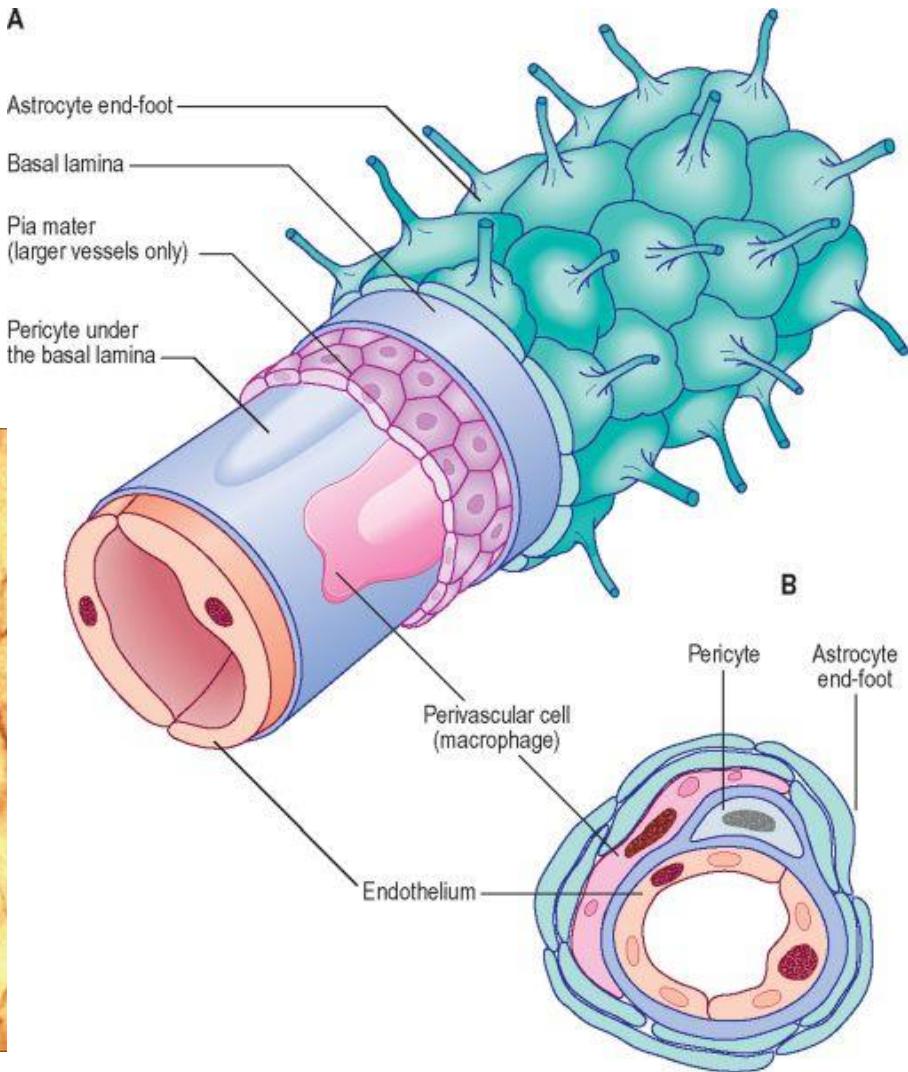

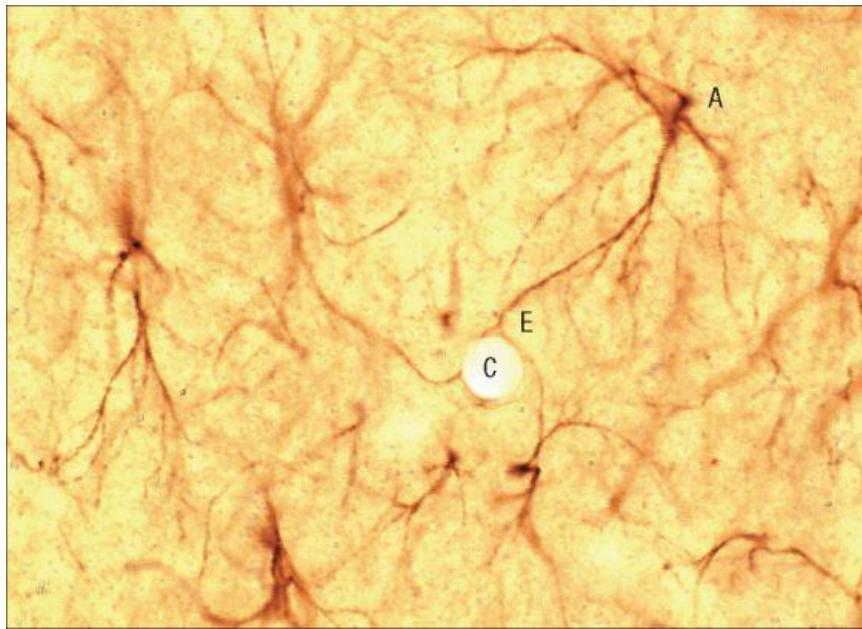

(a) Transverse sections of stages in the formation of a myelin sheath

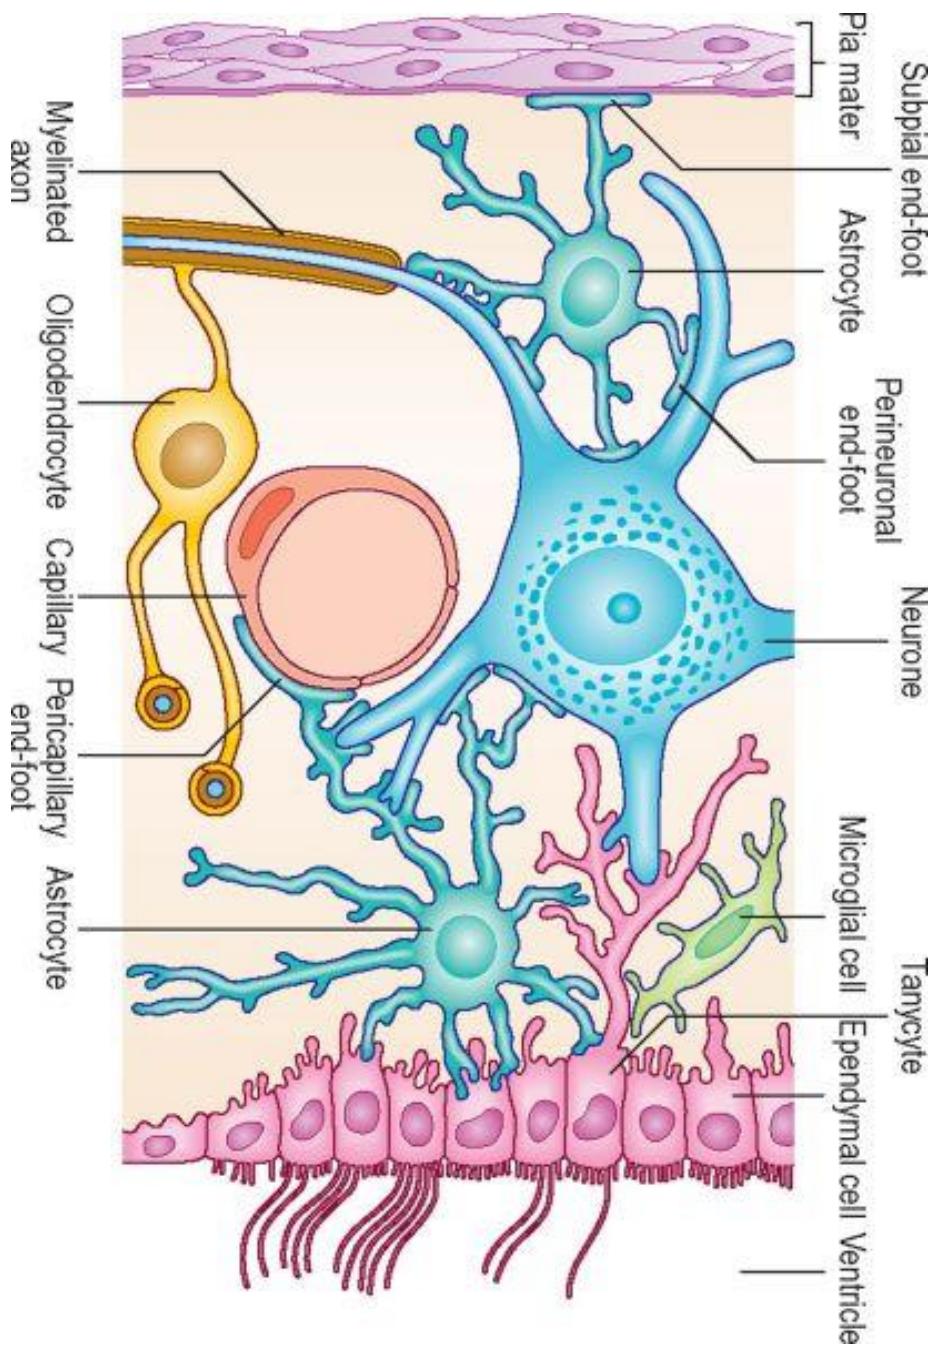

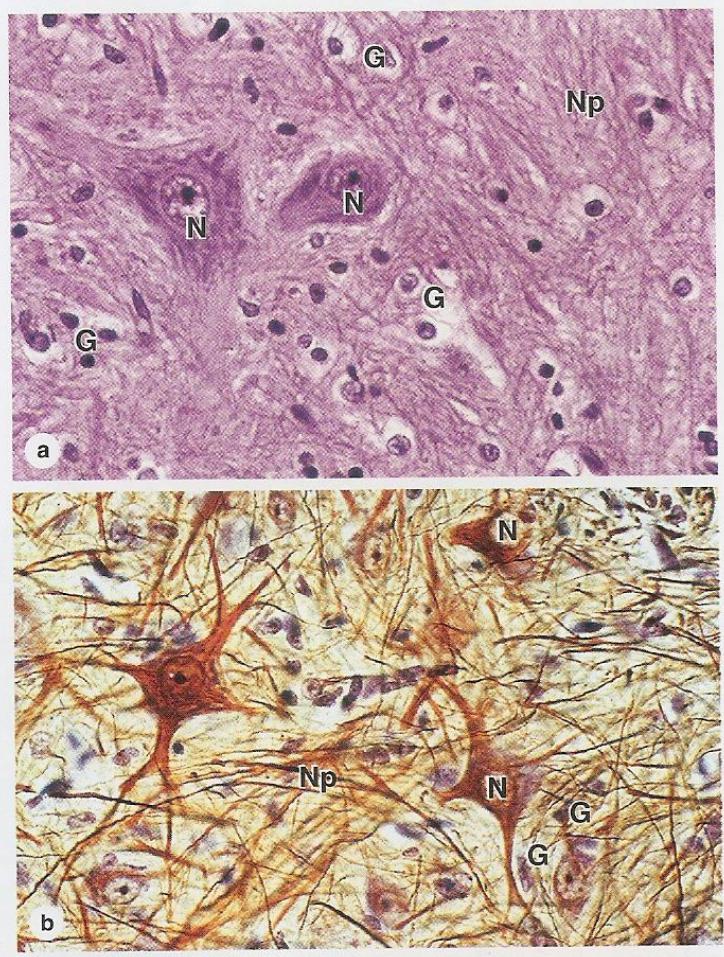

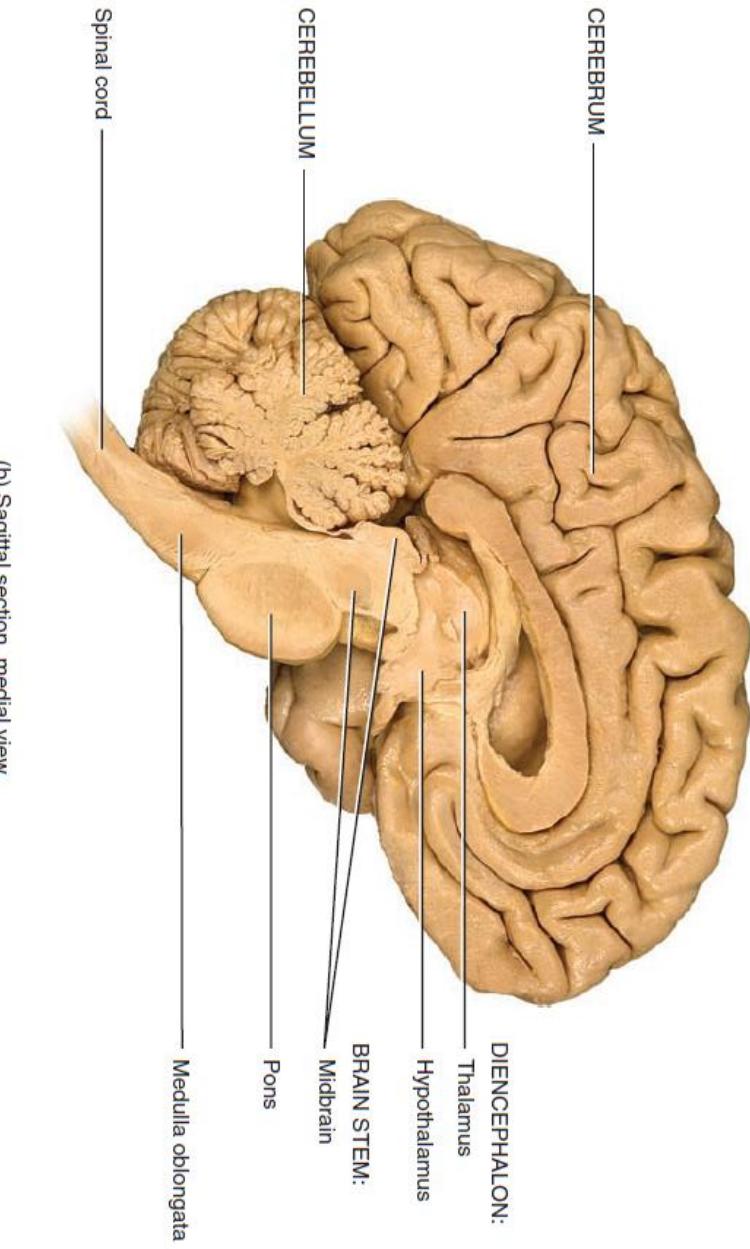

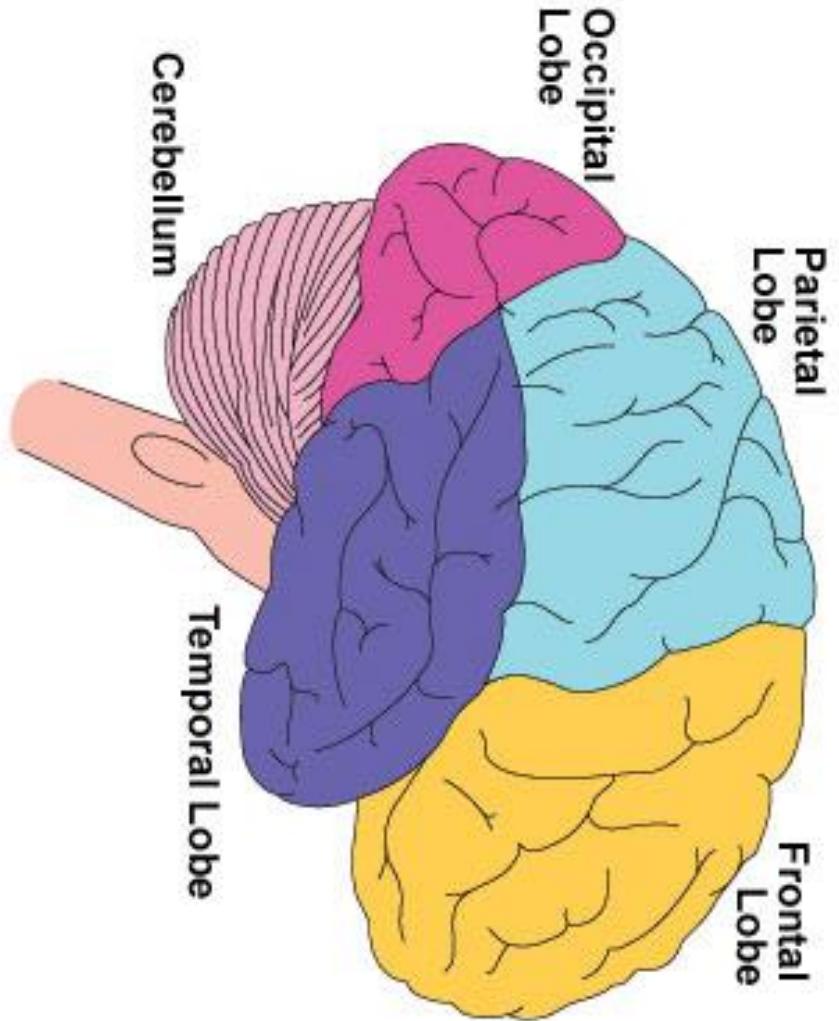

(b) Transverse section of unmyelinated axons

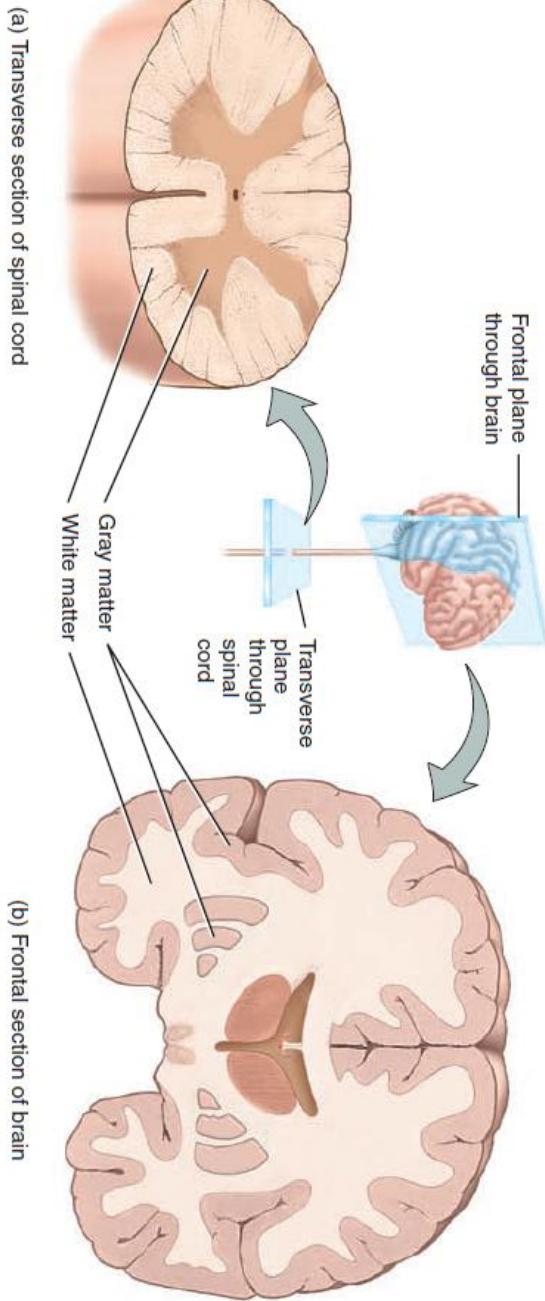

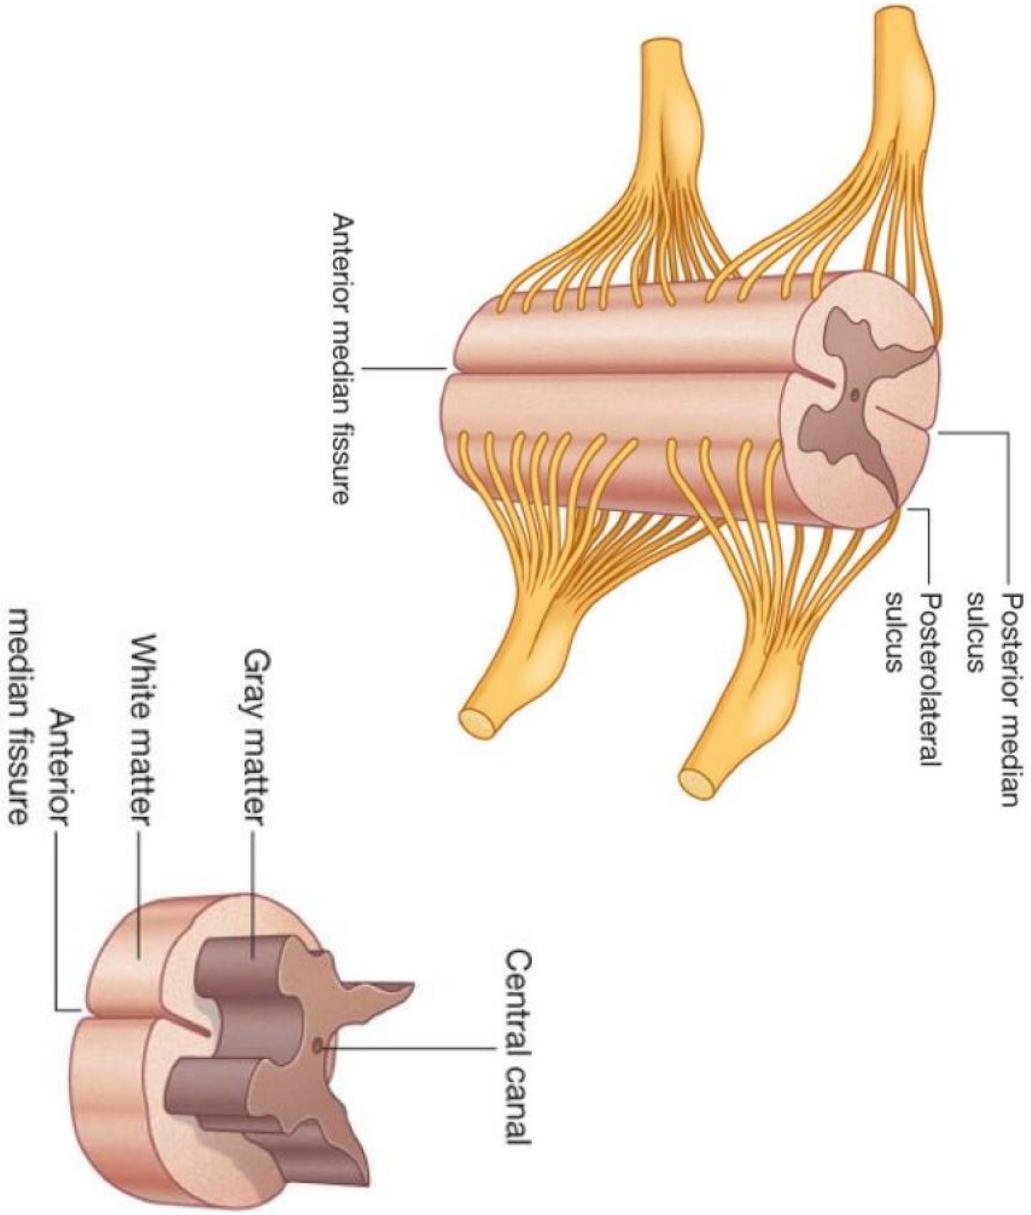

Blood Brain Barrier

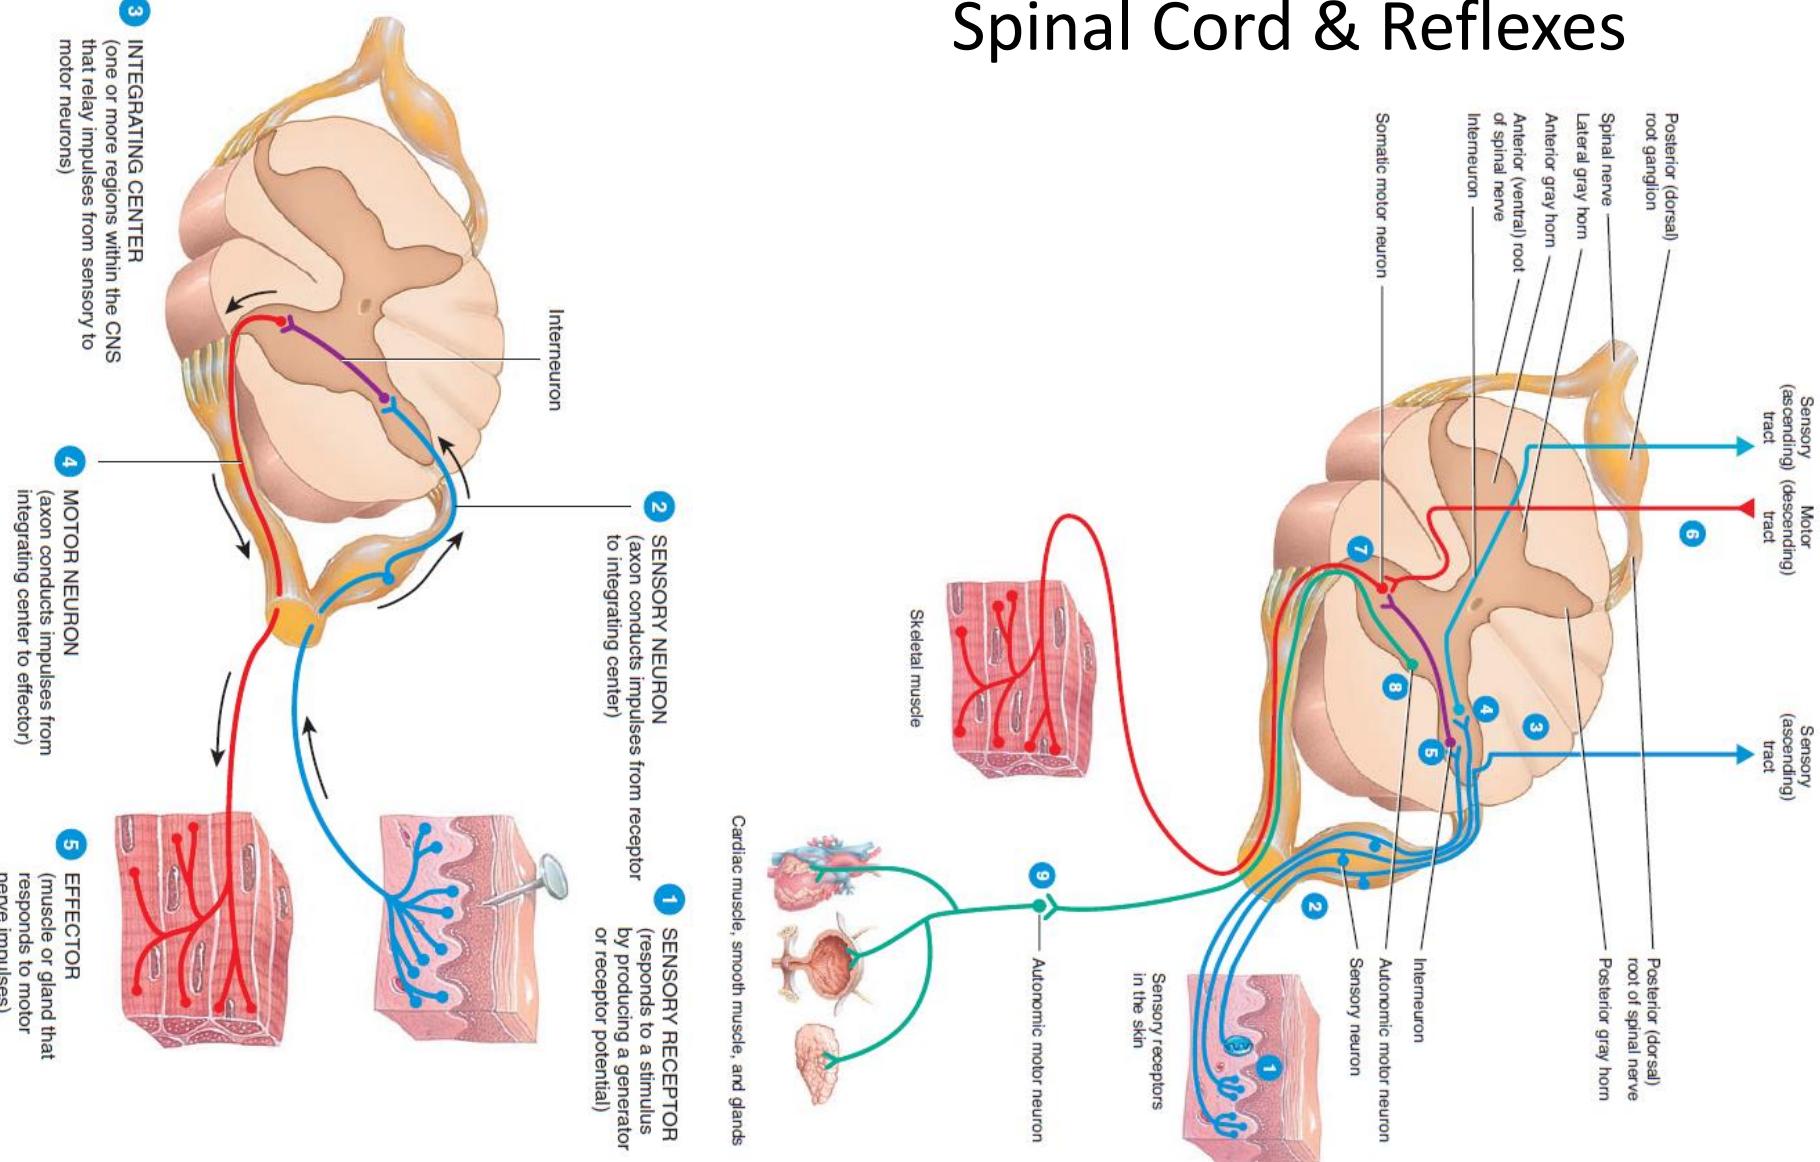

The Nervous Tissue

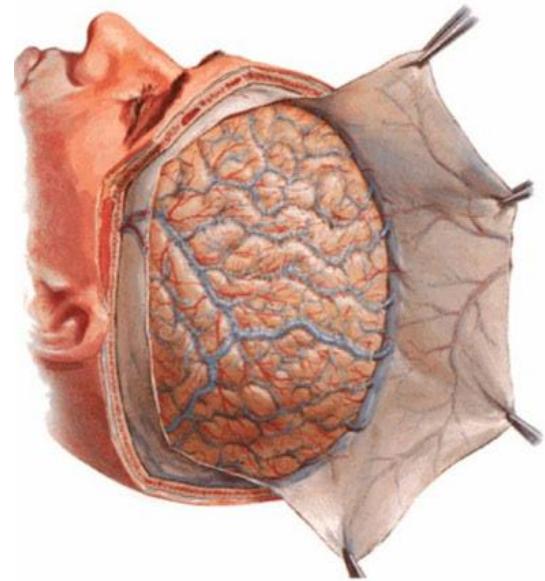

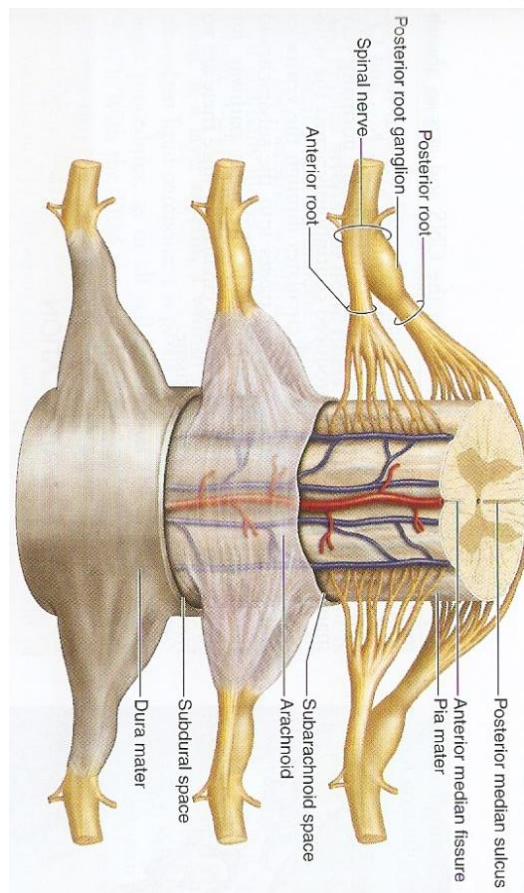

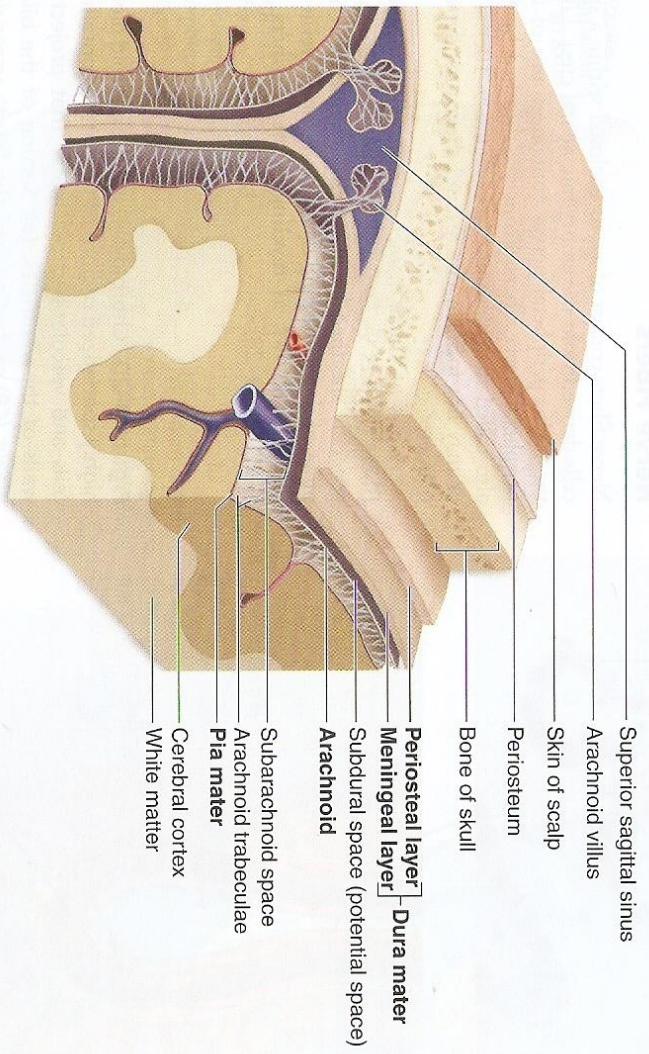

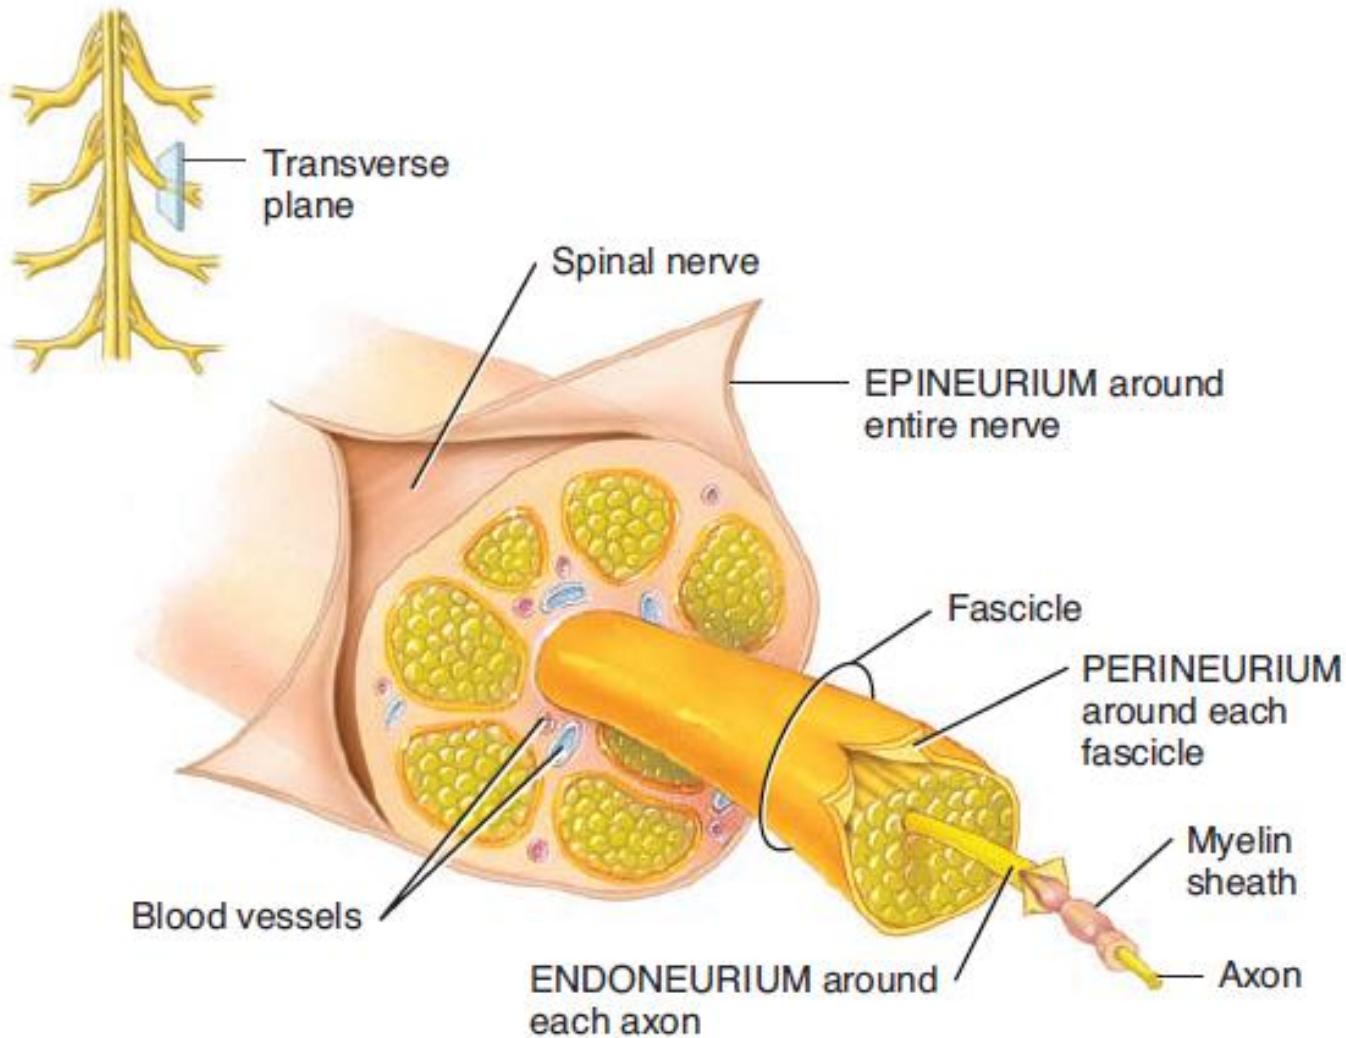

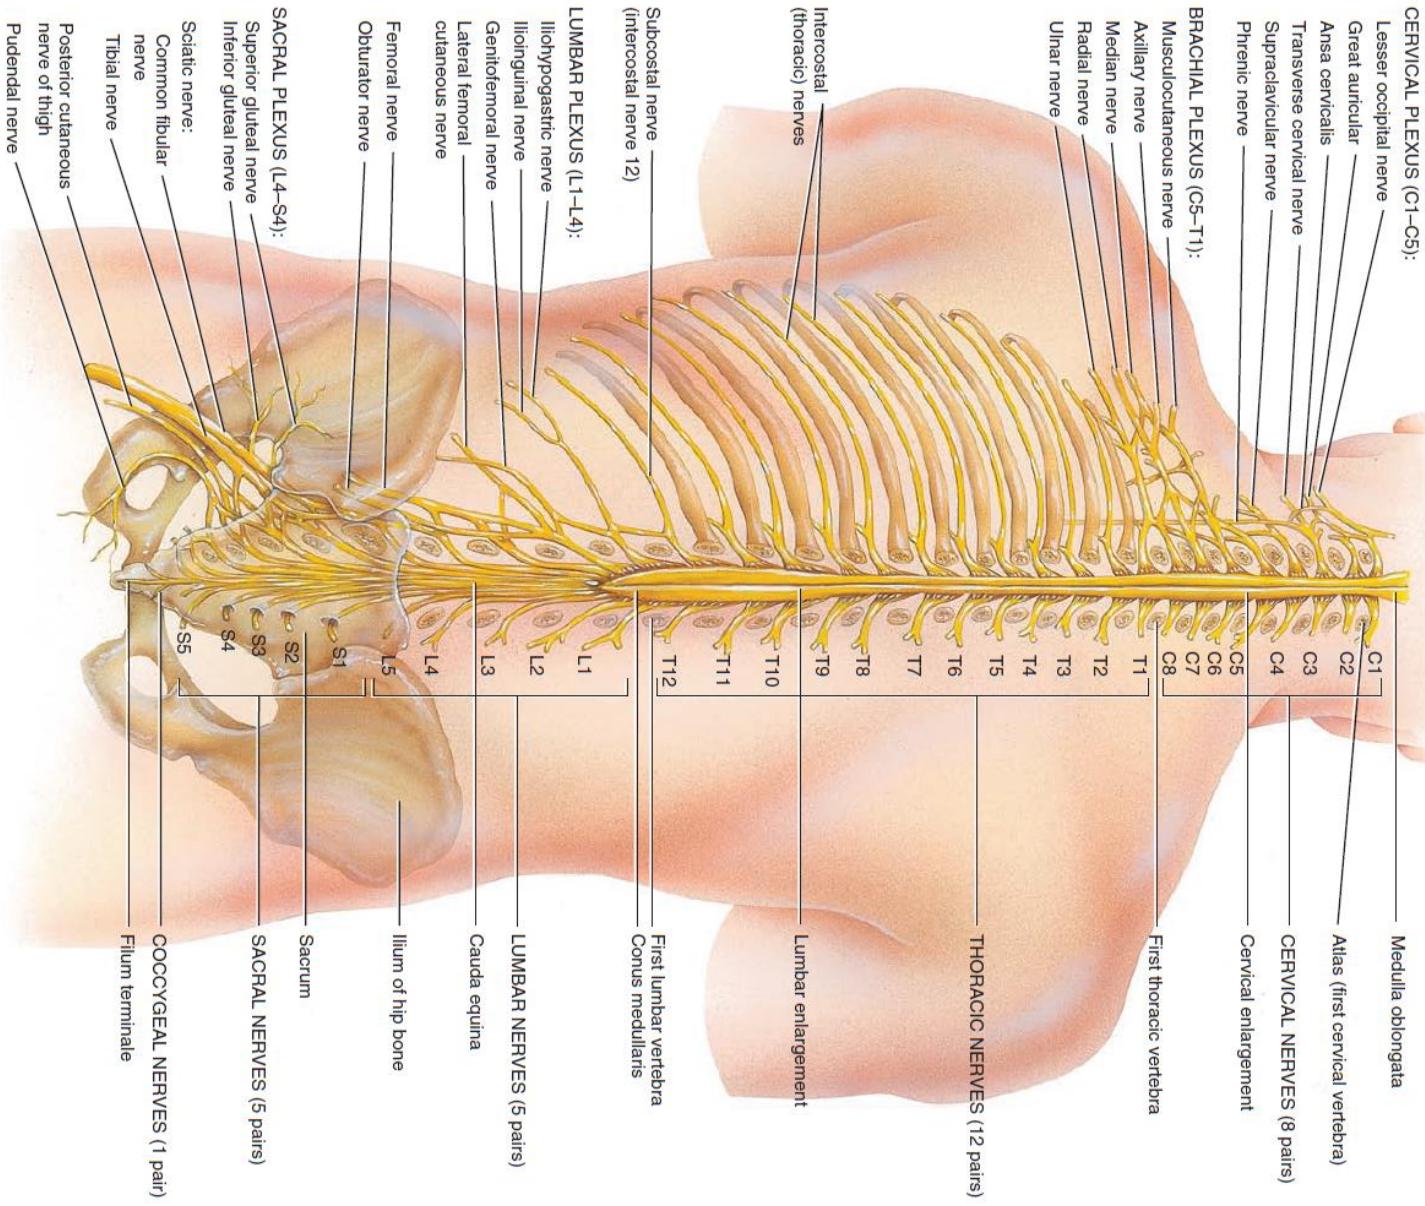

Spinal Cord & Reflexes

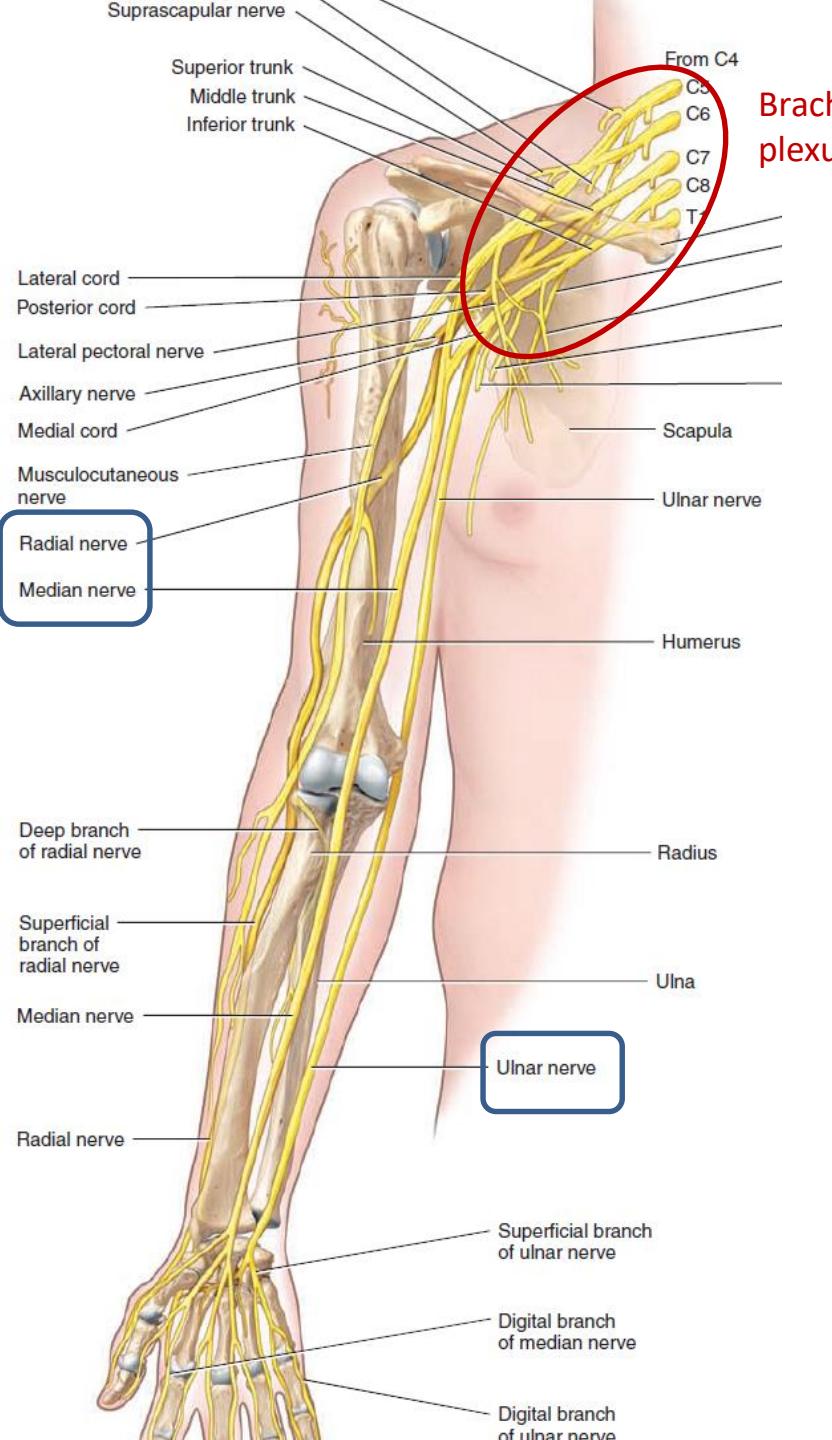

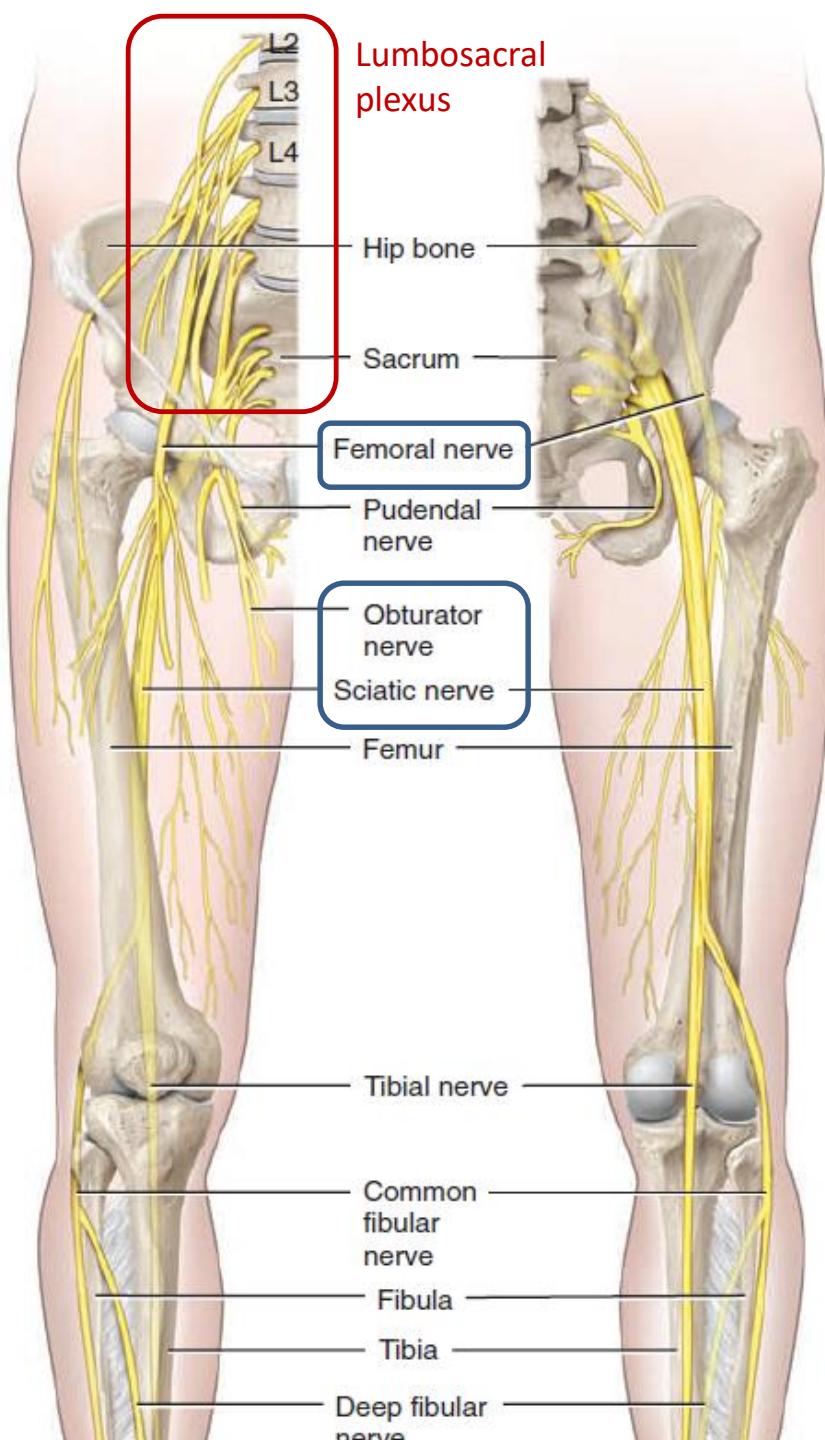

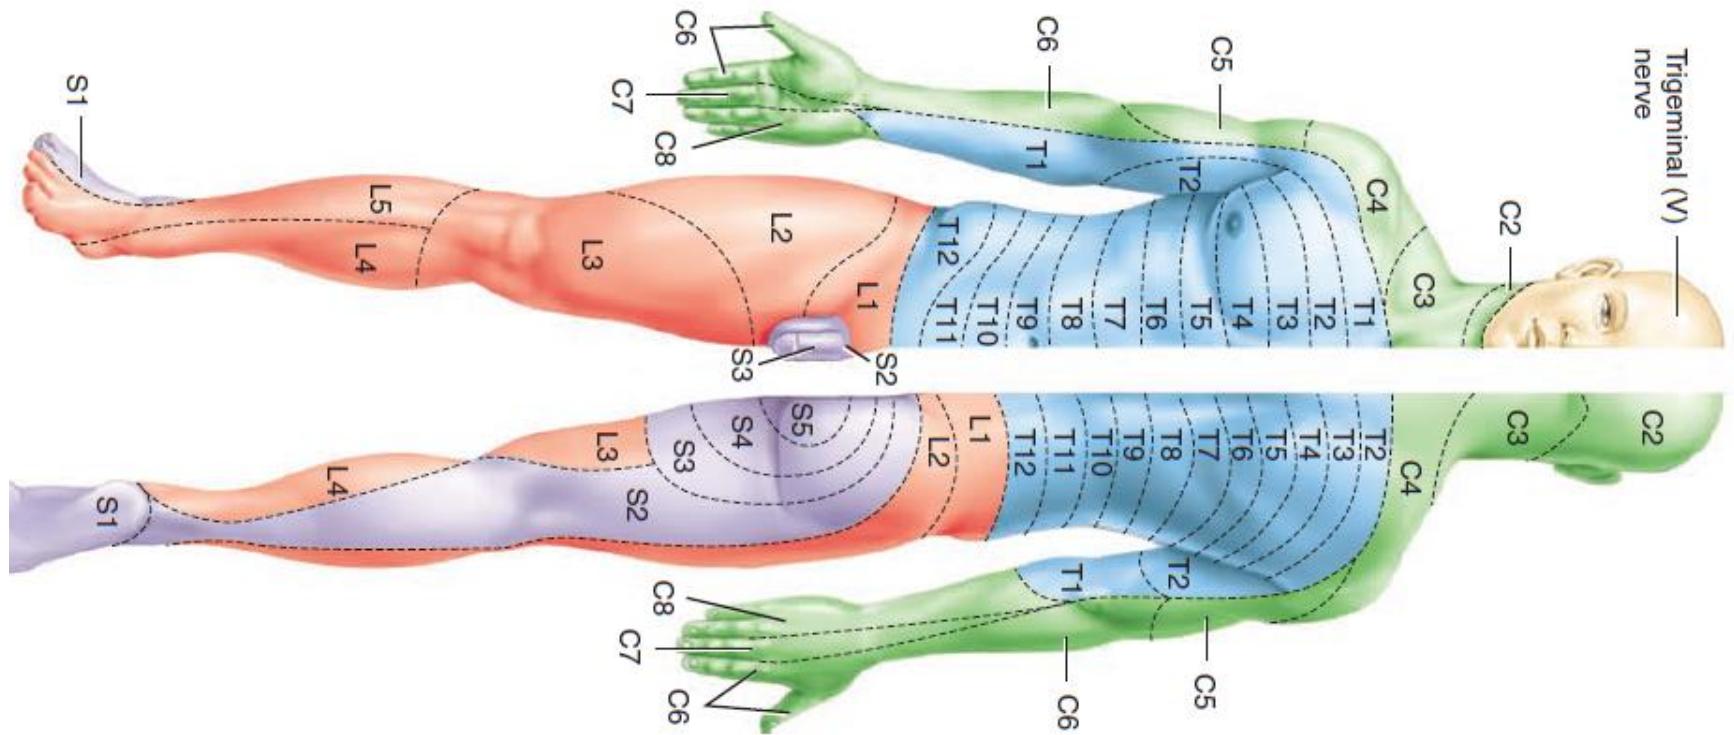

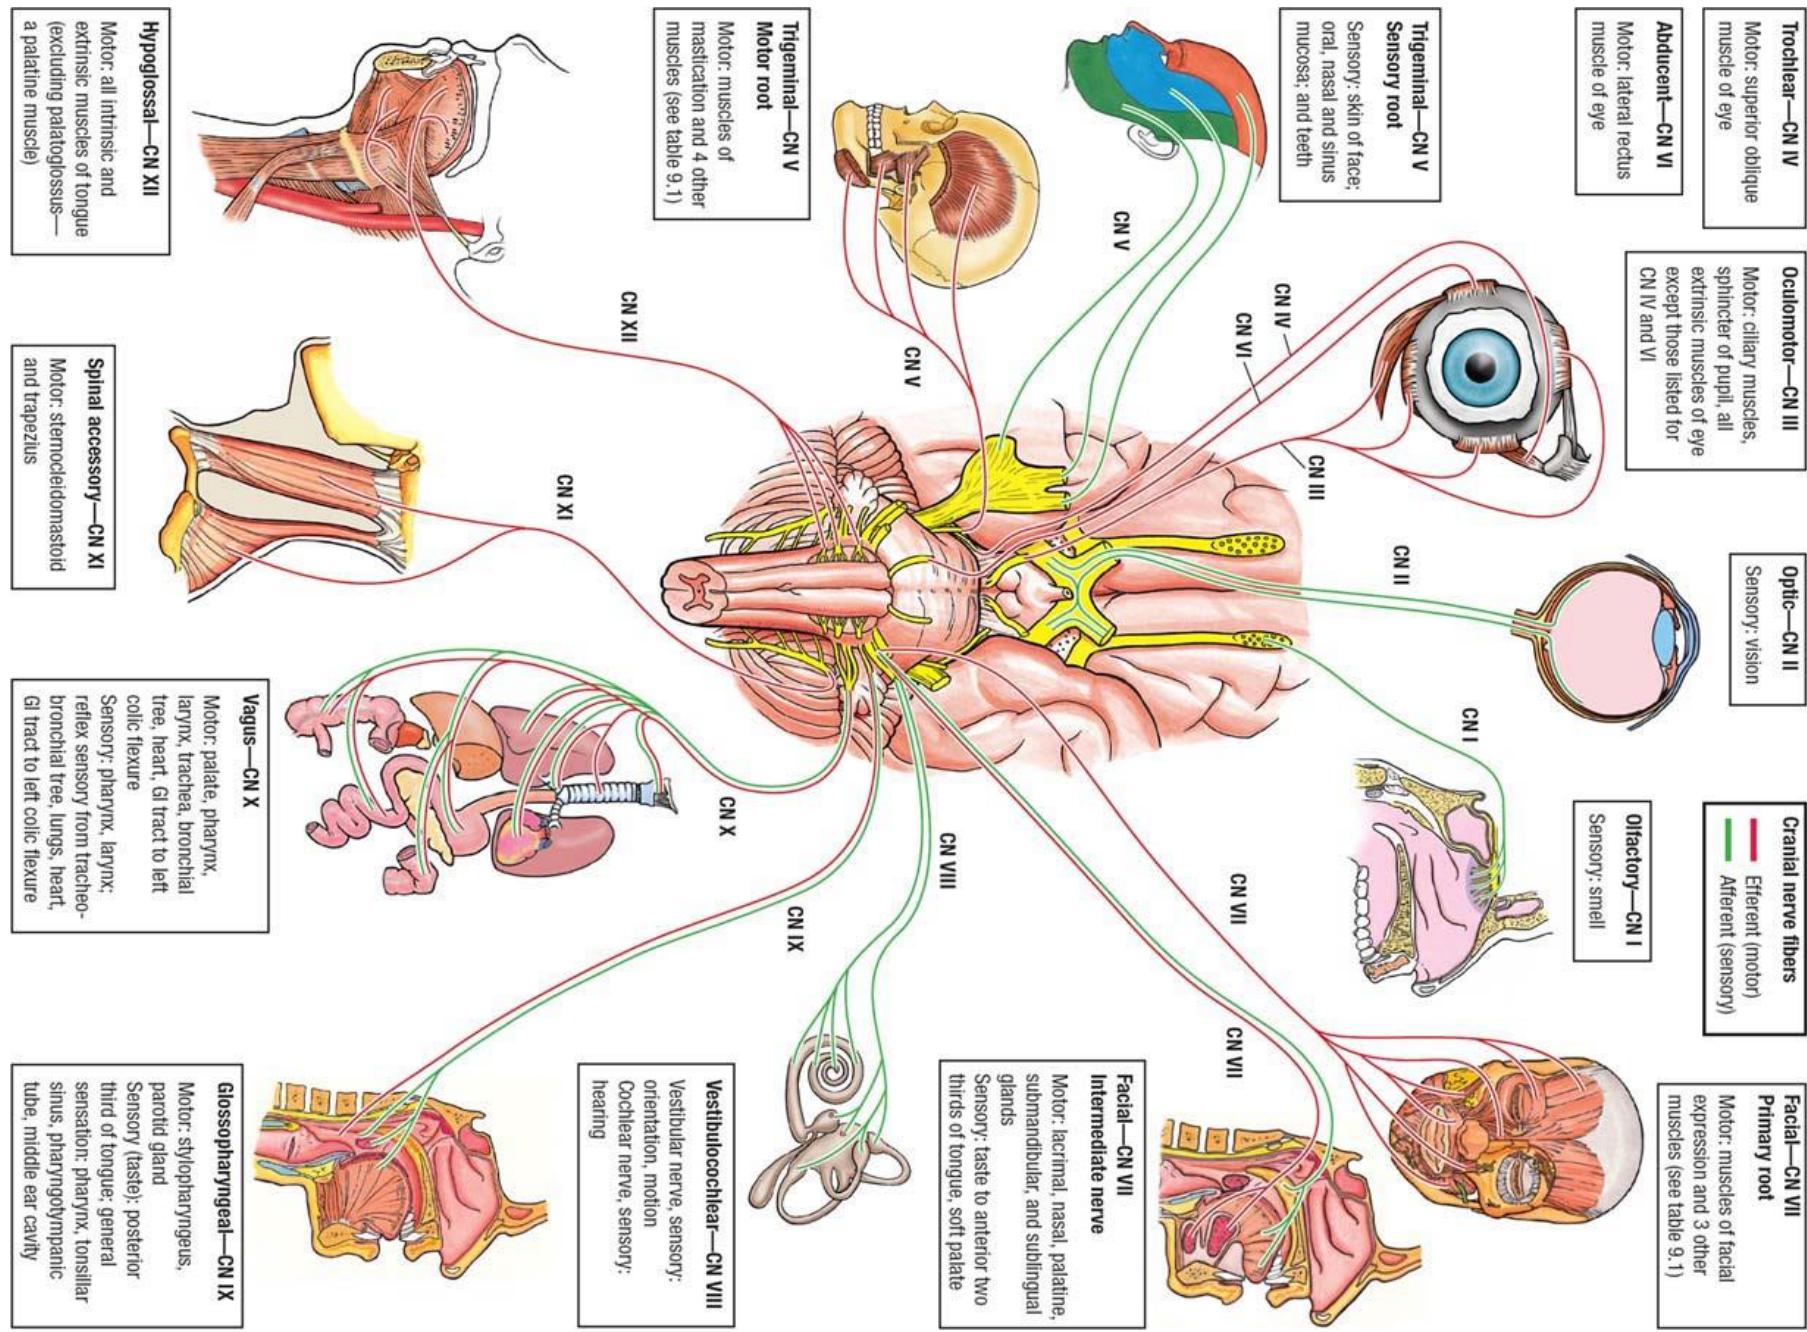

Spinal Nerves

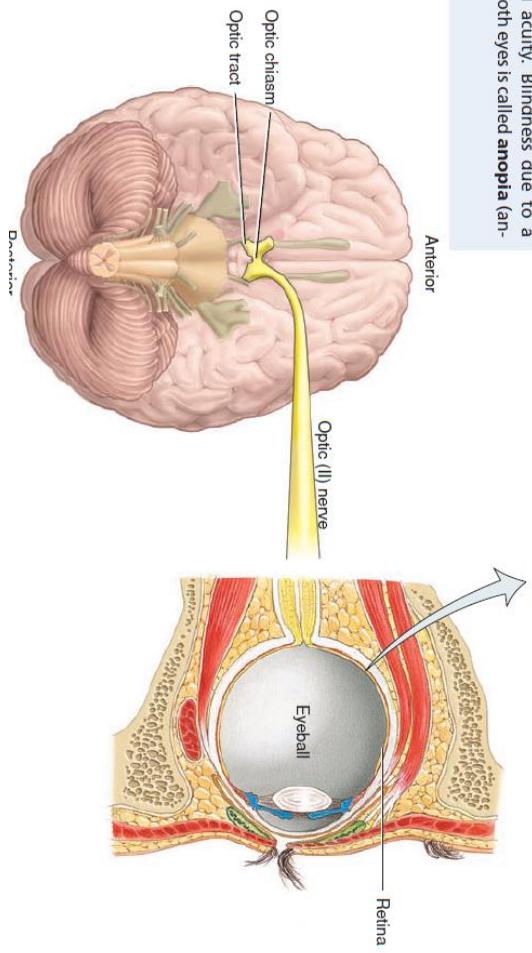

Dermatomes

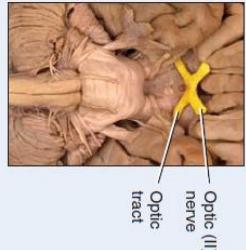

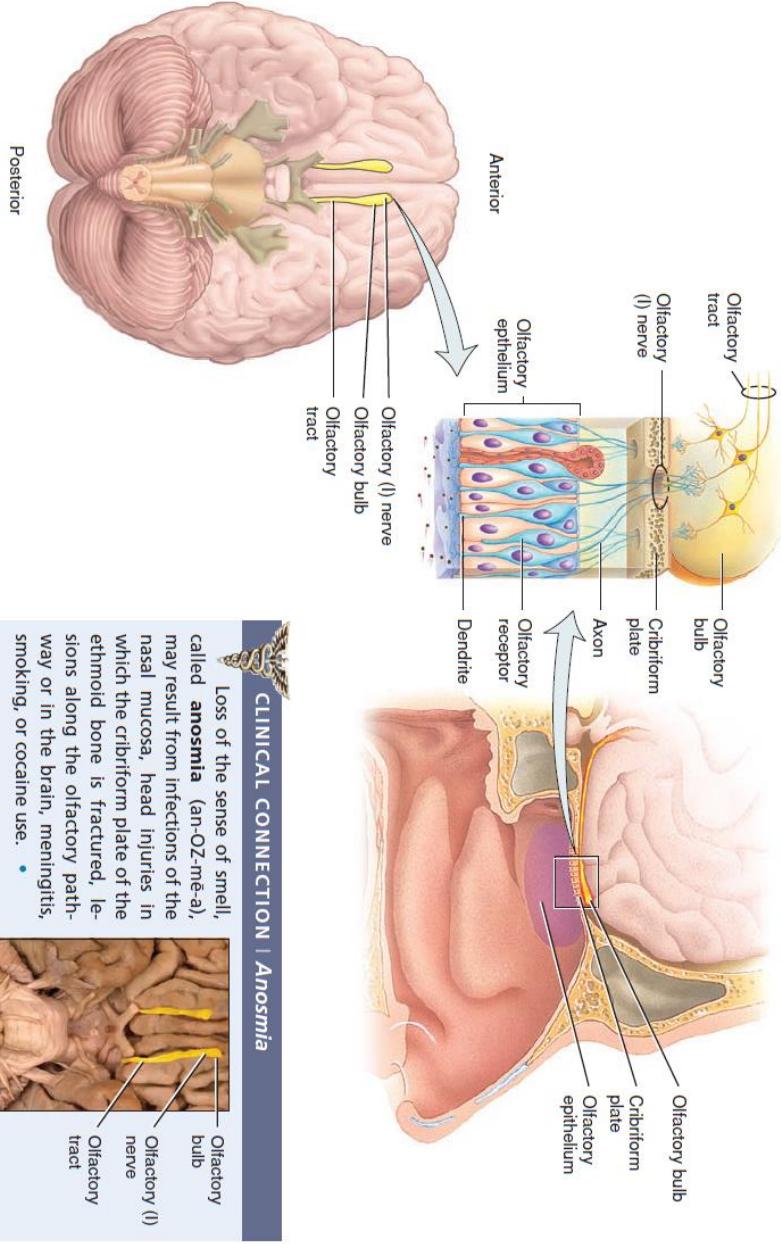

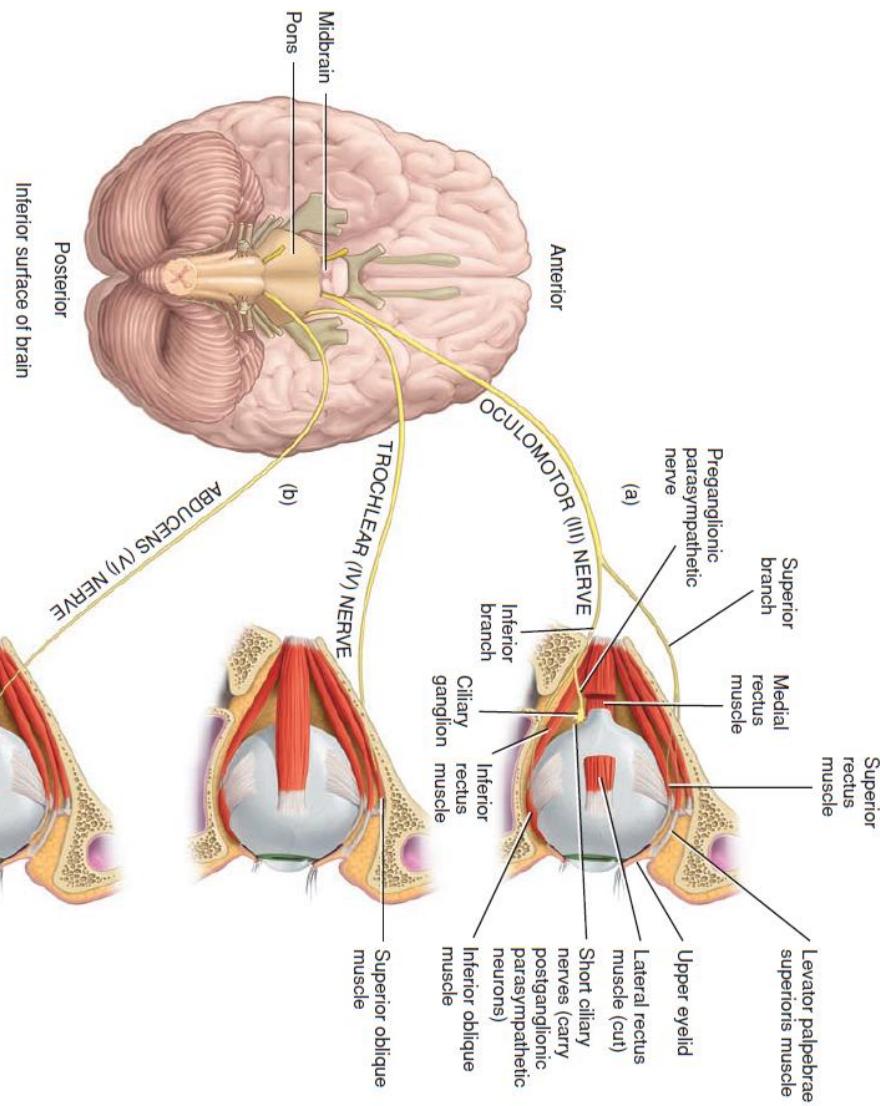

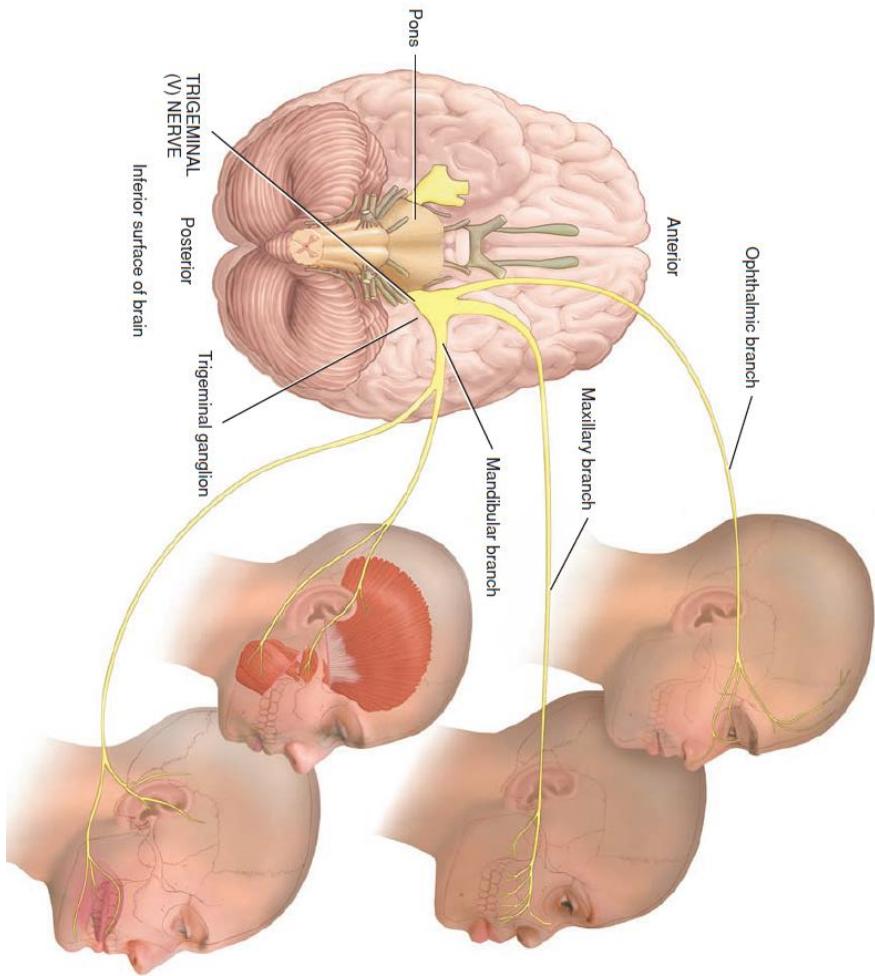

Fractures in the orbit; brain lesions, damage along the visual pathway, diseases of the nervous system (such as multiple sclerosis), pituitary gland tumors, or cerebral aneurysms (enlargements of blood vessels due to weakening of their walls) may result in visual field defects and loss of visual acuity. Blindness due to a defect in or loss of one or both eyes is called **anopia** (an-O-pē-a). •

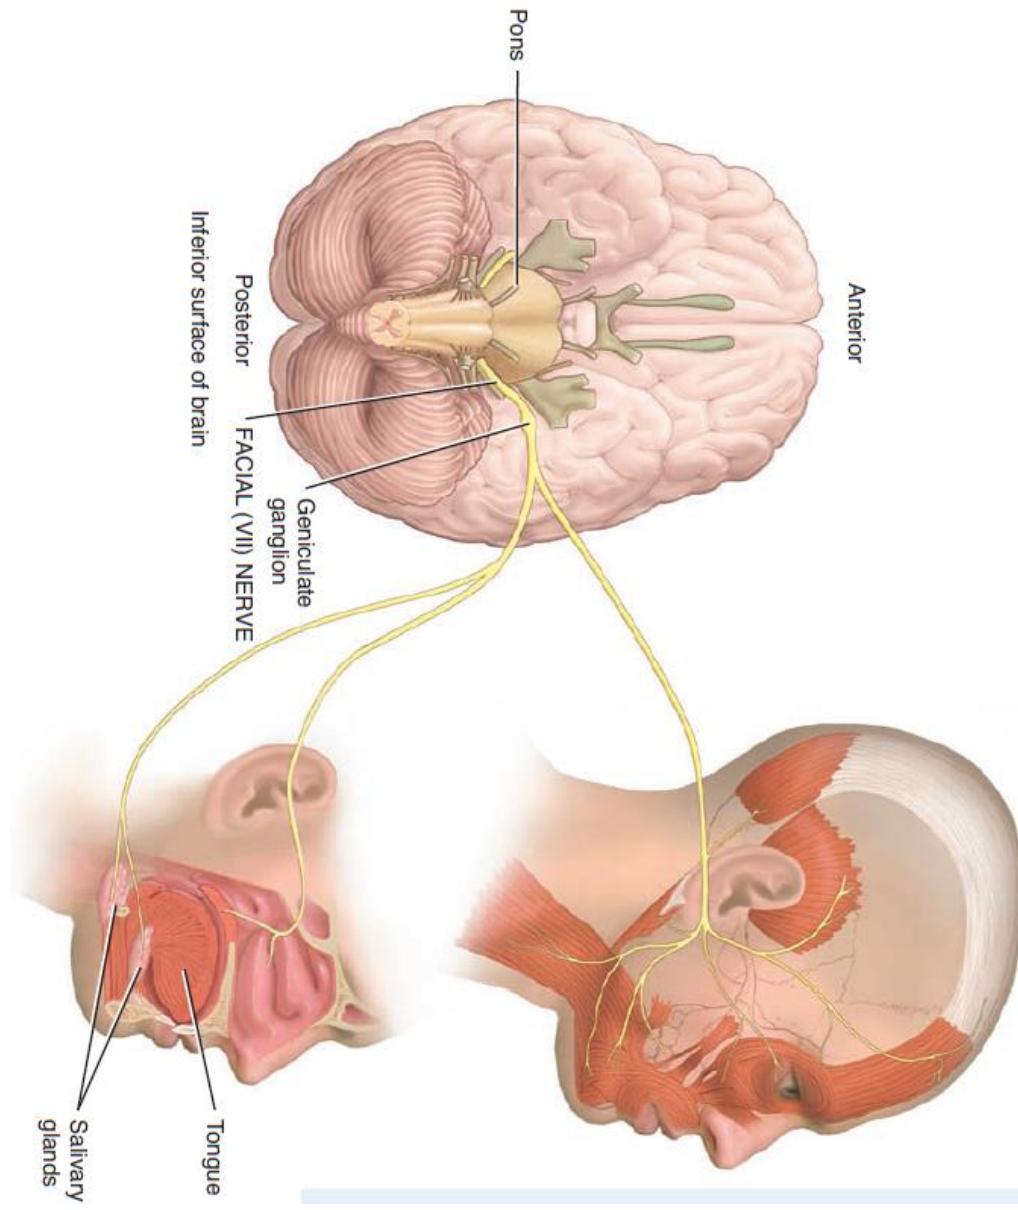

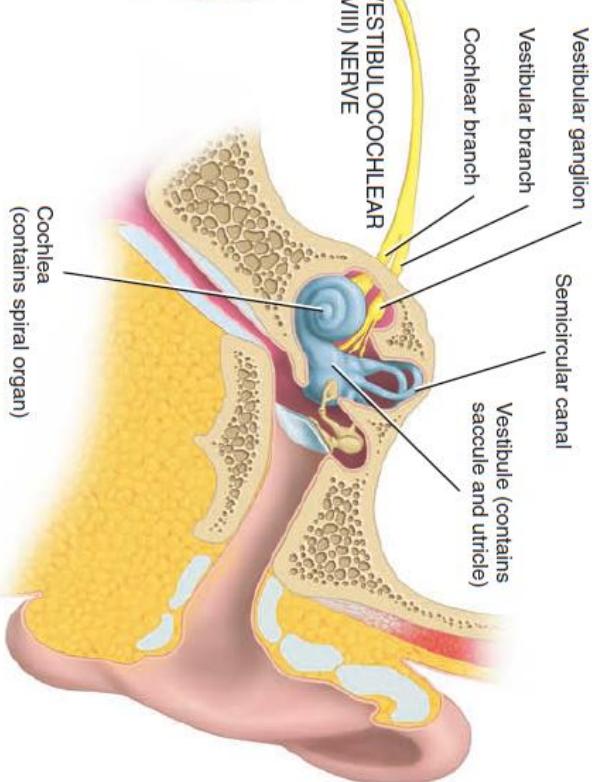

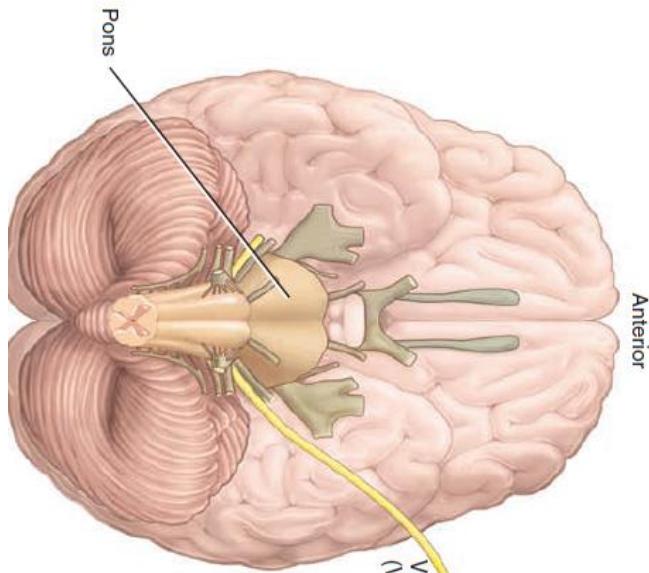

CLINICAL CONNECTION | Anopia

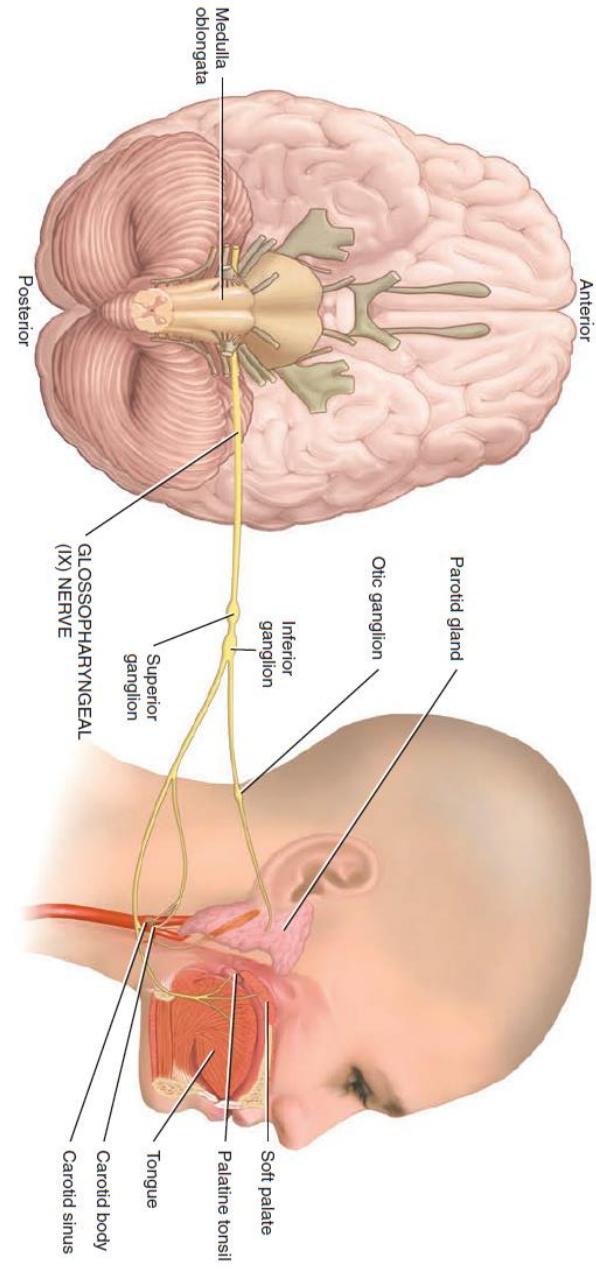

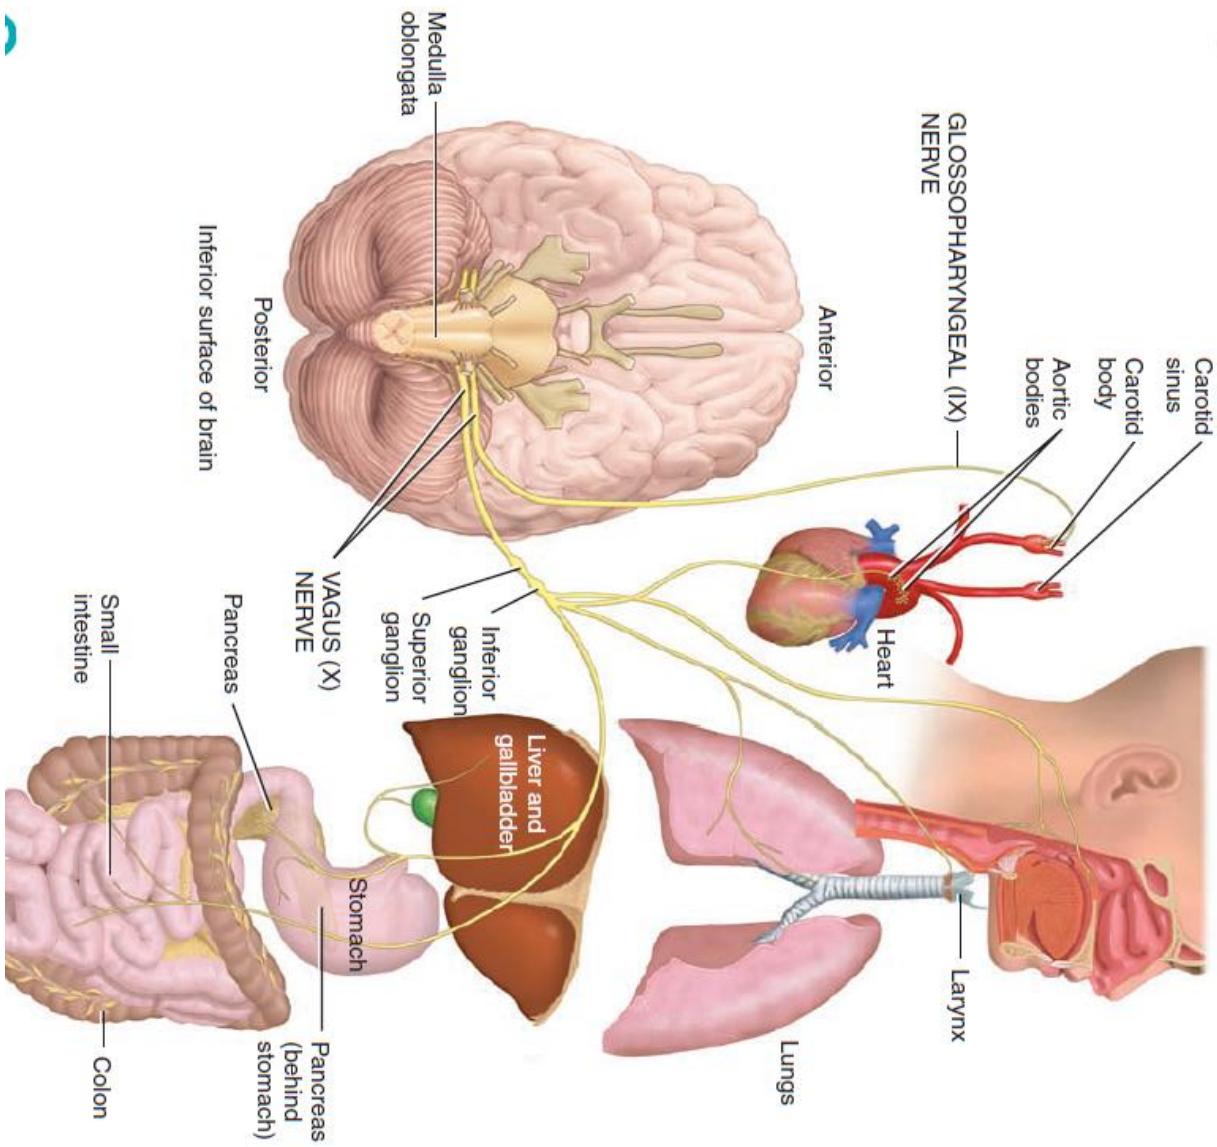

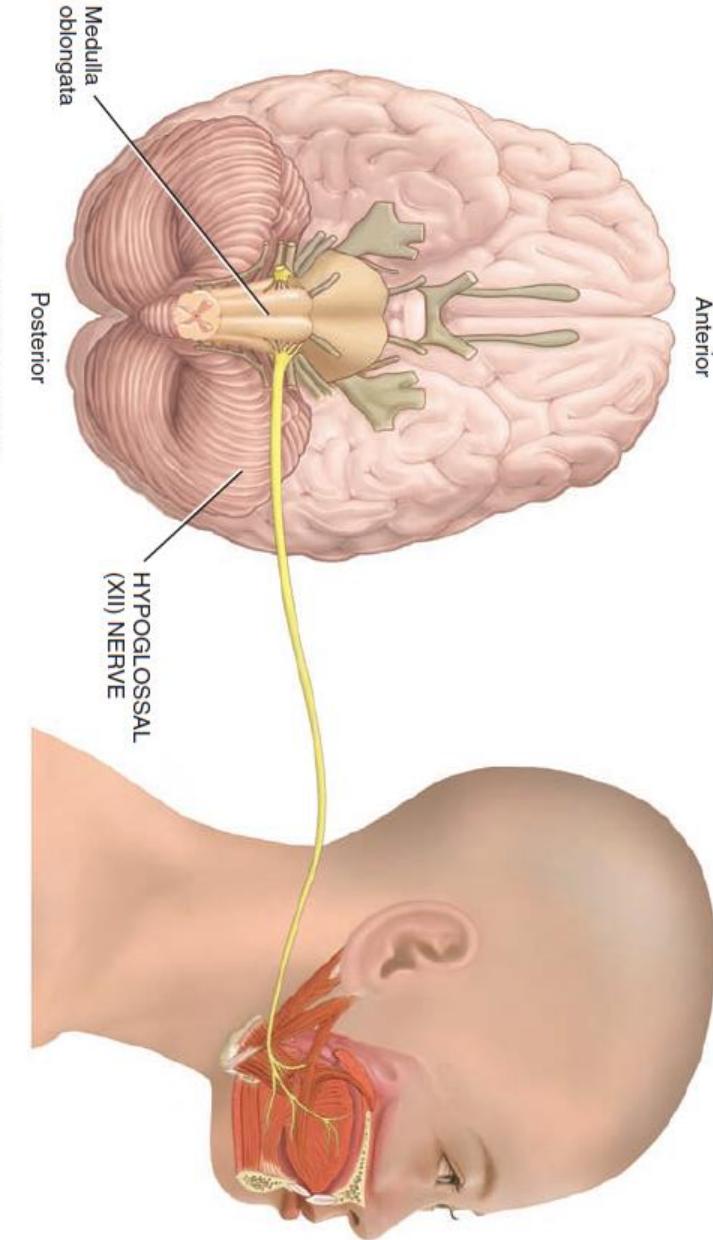

Fractures in the orbit; brain lesions, damage along the visual pathway, diseases of the nervous system (such as multiple sclerosis), pituitary gland tumors, or cerebral aneurysms (enlargements of blood vessels due to weakening of their walls) may result in visual field defects and loss of visual acuity. Blindness due to a defect in or loss of one or both eyes is called **anopia** (an-O-pē-a). •

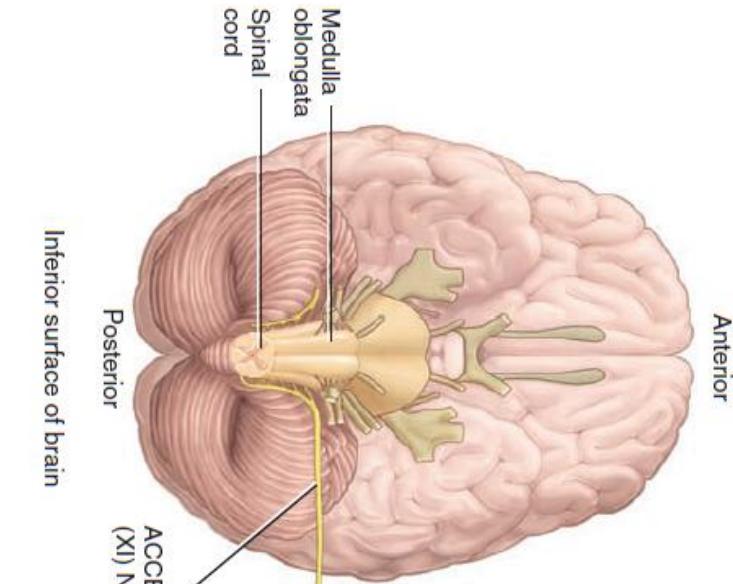

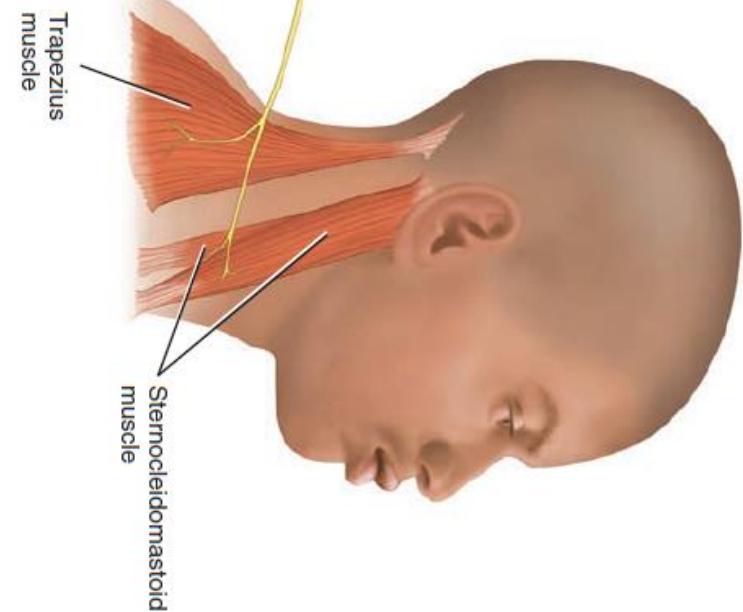

Inferior surface of brain

Anterior

Sternocleidomastoid

Trapezius muscle

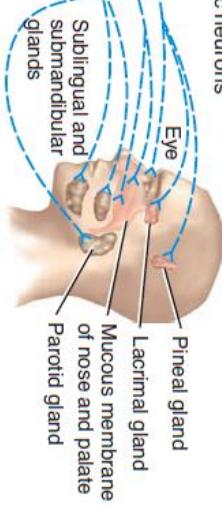

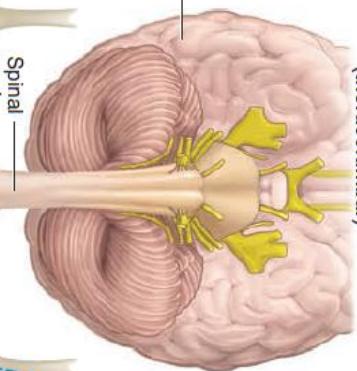

SYMPATHETIC DIVISION (thoracolumbar)

Key:

Preganglionic neurons
Postganglionic neurons

Distributed primarily to smooth muscle
of blood vessels of these organs:

Brain —

Pineal gland
Lacrimal gland
Mucous membrane of nose and palate
Parotid gland

Spinal cord
