<b>I</b>	<b>Groups</b>	<b>3</b>
1	Group Axioms and Examples	4
2	Abelian groups	11
3	Subgroups	13
4	Cyclic groups	20
5	The Symmetric Group $S_n$	22
6	Symmetries and Actions	33
7	Homomorphisms	36
8	Normal Subgroups and Quotient Groups	47
<b>II</b>	<b>Number Theory</b>	<b>54</b>
9	Background	55
10	Divisibility	57
11	Prime Numbers	64
12	Congruences[Gauss 1777-1855]	70
13	The Euler Totient Function [Euler 1707-1783]	76
14	Euler's and Fermat's Theorems	78
15	Pythagorean Triples	82
