

H.W (1) Suppose you have BP- ANN with 2-input, 2-hiddden, 1-output nodes with **sigmoid function** and the following matrices initial weights, trace with 2-iteration.

$$v = \begin{Bmatrix} 0.1 & 0.4 \\ -0.2 & 0.2 \end{Bmatrix} \quad W = \begin{Bmatrix} 0.2 \\ -0.5 \end{Bmatrix}, \quad \text{Where } \alpha = 0.1, \eta = 0.6$$

Epoch	i	Input		Output	Initial Weights						$Y_1$ ( $O_{\text{actual}}$ )	$\Delta_1$	$\delta_1$	$\delta_2$	Final Weights					
		$X_1$	$X_2$	$d_1$ ( $O_{\text{desired}}$ )	$V_{11}$	$V_{12}$	$V_{21}$	$V_{22}$	$W_{11}$	$W_{21}$					$V_{11}$	$V_{12}$	$V_{21}$	$V_{22}$	$W_{11}$	$W_{21}$
1	1	0.4	-0.7	0.1	0.1	0.4	-0.2	0.2	0.2	-0.5										
	2	0.3	-0.5	0.05																
	3	0.6	0.1	0.3																
	4	0.2	0.4	0.25																
	5	0.1	-0.2	0.12																
2	1	0.4	-0.7	0.1																
	2	0.3	-0.5	0.05																
	3	0.6	0.1	0.3																
	4	0.2	0.4	0.25																
	5	0.1	-0.2	0.12
