H.W Lecture 4 part 2

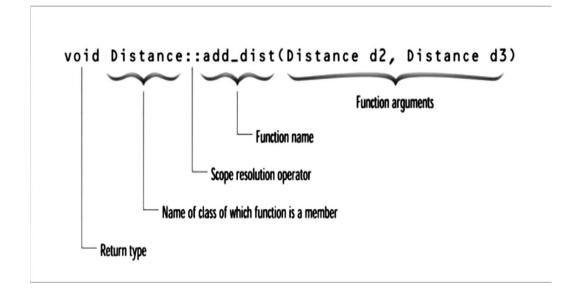

Q1\ Define of the following:

1- Copy constructor:- is used to declare and initialize an object from another object.

2- Constructor overloaded:- is more than one constructor function is defined in a class.

3- Scope resolution operator:- is new symbol the double colon (::), it is a way of specifying what something is associated with.

Q2\ What is the general formula for write member functions defined outside the class?

```
Void — Return type نوع الارجاع

Distance — The class name اسم الفئة

The double colon, this symbol is called the scope resolution operator نقطتين مزدوجه و هذا الرمز يسمى عامل دقة النطاق

add_dist() — The function name اسم الدالة

(Distance d2, Distance d3) — Function arguments
```

Q3\ How to write statement for object copy constructor?

```
integer L2(L1);
integer L2=L1;
```
